**EXHIBIT A, STATEMENT OF WORK
(GRANT APPLICATION)**

Electronic Recording Technology Board

Grant Application

To Whom It May Concern;

I want to personally thank you for presenting this opportunity once again. When I first came into this office (2004) I dreamed of the day remote access to digitally secure records would become a reality, this is representative of that! Six years ago, I asked my Board of County Commissioners to begin this journey and trust that I would do my part pursuing every avenue of additional funding to make this project my priority one. I have spent motor vehicle late fee funds (per my discretion), applied for and received a cog grant, and committed recording surcharge fees, even postponed updating equipment in exchange for budget dollars to help this project happen. Receiving our first ERTB grant allowed us to scan and index all of our records with in the books, as well as a significant amount of loose "filed" documents and maps. Since 1892 original documents have been stockpiled, filed in books and drawers, and available to the public for inspection. The result is dirty hands, miss-filings, tears, wrinkles and fading script, causing the ONLY original copies of precious historical records to be endangered. Getting a digital record to not only be more manipulable but more importantly SAFE was an obvious solution. Being able to redact personal information on a digital copy is wonderful. This project means even more to me as we are so isolated in our rural setting. With no local title companies, the minimum driving distance for all record research is 30 miles from the closest small town (one title company) and 60 miles from the most popular "local" title company. Denver used to send searchers regularly, they would have to spend the night with a 350-mile commute. Remote searching also aids in our simple logistics. Being a tiny county, I have a tiny office (one room serves all) and I have been able to move a workstation dedicated to searching, into the public area saving half of my square footage that serves all of our motor vehicle, election, marriage licensing, clerk to the board functions, and my personal desk. All of this to say, this project has been my priority since 2006, with Phase One through Three complete (the scanning and indexing) I feel the timing of the first grant was serendipitous to bring this county onto the cutting edge of technology, making our small office as efficient as possible and offering a level of solid protection as is my duty. This fulfills a promise to my Commissioners and my constituents and will be a source of pride for years to come. The ability to reapply for funding to support the ongoing maintenance costs of keeping all records digital is an incredible opportunity. Thank you, and I look forward to answering any questions or any discussion you may have,
