II. ORDER.....9

 A. The Commission Orders That:9

 B. ADOPTED IN COMMISSIONERS’ WEEKLY MEETING DECEMBER 14, 2016. ...10

I. BY THE COMMISSION

A. Statement

1. The Colorado Public Utilities Commission (Commission) issues this Notice of Proposed Rulemaking (NOPR) to amend the Rules Regulating Railroads, Rail Fixed Guideways, Transportation By Rail, and Rail Crossings contained in 4 Code of Colorado Regulations (CCR) 723-7. The proposed rules implement House Bill 13-1103; incorporate changes in the 2009 Manual on Uniform Traffic Control Devices and the Colorado Supplement to the Federal Manual on Uniform Traffic Control Devices 2009, as adopted by the Transportation Commission of Colorado on December 15, 2011, and updated February 26, 2016; adopt temporary safety measures and implement minimum crossing safety requirements in Colorado; add definitions and change application requirements so only necessary information is provided by type of authority being sought; and amend the current rules to make them consistent with the remaining Commission rules.

2. We do not propose amendments to Rules 7302-7319 (General Safety), 7320-7326 and 7328-7339 (Railroad Clearances), and 7400-7404 (Employment of Class I Railroad Peace Officers) because there are no changes required through the above-mentioned authorities. Additionally, we do not propose amendments to Rules 7340-7399 (System Safety Program Standard for Rail Fixed Guideway Systems) because Rules 7340-7399 will be the subject of a future rulemaking to implement requirements of the “Moving Ahead for Progress in the 21st Century Act” (MAP-21) and the new requirements of 49 CFR Parts 673-674.

3. We welcome comments from interested participants. To the extent a participant disagrees with the proposed rules, comments should include suggested rules revisions in legislative format.

B. Proposed Rule Changes

4. We specifically request that interested parties, including road authorities, railroads, railroad corporations, rail fixed guideways, rail fixed guideway systems, and transit agencies regulated by these rules comment on the following rules and propose any alternative rules, in legislative format, that are consistent with the statutory and rule changes.

1. General Provisions – Scope and Applicability

5. Proposed Rule 7000(a) adds that the scope and applicability of the rules applies to both public highways and public pathways.

6. Proposed Rule 7000(b) removes any ambiguity regarding which rules apply to the Regional Transportation District (RTD) commuter rail and light rail crossings and which rules apply to State Safety Oversight of RTD's rail fixed guideway system. The enabling statutes for the Commission to oversee safety of rail fixed guideway systems are specific to the mode of transportation (a rail fixed guideway system) and not the type of agency (a statutory transportation district). This proposed rule and changes in proposed Rule 7006 also enact the changes resulting from the MAP-21 legislation and resulting statutory changes in House Bill 13-1103 regarding annual reporting requirements and payment into the Fixed Utility Fund.

2. Definitions

7. Changes are proposed to Rules 7001 and 7201 to add and change definitions. A definition for "road authority" is added as to Rule 7001(f) to specifically define the Commission's jurisdiction of the public highway or public pathway at a crossing.

8. A substantial number of definitions have been added to proposed Rule 7201 to define terms used in the proposed rule changes to crossing and warning device applications. We have also proposed new definitions for the terms “public crossing” and “private crossing” to provide definition to terms that are used frequently by the Commission and the industry. We have also updated our definition for “reasonably adequate facility” and have added a definition for “theoretical structure” based on federal use of this term and including a specific reference to the Colorado Department of Transportation Bridge Design manual for use in the design of a theoretical structure for grade separation cost allocation request applications and comments from the 2008 rail rules workshop.

3. Incorporation by Reference

9. References incorporated into these rules are updated in proposed Rule 7008. Additionally, references included in current Rule 7202 are moved to proposed Rule 7008, updated, and current rule 7202 is removed from the proposed rules.

4. Who May Apply

10. Changes were made to Rule 7203 to incorporate the new definition for “road authority” and to clarify all entities that may apply for specific types of authorities.

5. Application Content

11. Changes were made to Rules 7002, 7101, 7102, 7103, and 7204 to make these rules consistent with the remaining Commission rules involving applications. Rule 7002 contains information that is required in all types of rail-related applications to the Commission and removes this similar information from Rules 7101, 7102, 7103, and 7204.

12. In Proposed Rule 7204, major changes have been made in an attempt to limit and target the information provided in applications to only that information required by the Commission to make a determination on specific types of authorities.

This proposed rule removes the 20 items currently required in all applications for crossings and warning devices and changes the information requirements to authority-specific information. Rule 7204(a)(I) outlines information required in all crossing warning device applications. Rule 7204(a)(II-XIV) outlines the additional information to provide for applications requesting specific items, including:

- 7204(a)(II) - applications requesting a new at-grade crossing;
- 7204(a)(III) - applications to widen, narrow, or relocated existing crossings;
- 7204(a)(IV) - applications to close a crossing by removal of tracks;
- 7204(a)(V) - applications to close a crossing by removal of the roadway or pathway;
- 7204(a)(VI) - applications to install or change passive warning devices at crossings;
- 7204(a)(VII) - applications for installation of new active warning devices, replacement of existing active warning devices, or replacement of existing train detection circuitry at crossings;
- 7204(a)(VIII) - applications for installation of four quadrant gate active warning devices;
- 7204(a)(IX) - applications involving interconnection to traffic signals or queue cutter signals and preemption by active warning signals;
- 7204(a)(X) - applications involving cost allocation to the Highway-Rail Crossing Signalization Fund or Federal Section 130 fund;
- 7204(a)(XI) - applications changing an existing crossing from a public crossing to a private crossing;
- 7204(a)(XII) - applications changing an existing crossing from a private crossing to a public crossing;
- 7204(a)(XIII) - applications to construct a grade separated crossing; and
- 7204(a)(XIV) - applications for a utility crossing.

13. Proposed Rule 7204(d) incorporates the temporary rule regarding applications for proposed temporary safety measures.

6. Additional Application Contents for Cost Allocation Requests in Grade Separation Applications

14. Proposed Rule 7205 makes minor changes to theoretical structure requirements based on the workshops held in 2008 regarding grade separation cost allocation.

7. Grade Separations – Minimum Criteria for Cost Allocation Consideration

15. Proposed Rule 7205 makes minor changes to theoretical structure requirements based on the workshops held in 2008 regarding grade separation cost allocation.

8. Cost Allocation for Grade Separation

16. New proposed Rule 7207(c) adds a description of how the Commission tracks the allocation of grade separation costs by railroad.

9. Notice

17. Changes are made in proposed Rule 7208(c) to codify how the Commission has been handling the simultaneous provision of notice of a proposed crossing closure to those entities identified in the application and posting of the notice of closure at the crossing.

10. Crossing Construction and Maintenance

18. Proposed Rule 7211 makes changes to the rules regarding crossing construction and maintenance. Proposed Rule 7211(a) requires railroads, railroad corporations, rail fixed guideway, transit agencies, and owners of track to pay for the cost and installation of replacing crossing surfaces and requiring road authorities to pay for the cost of railroad flagging required to maintain the roadway surface between tracks at multiple track crossings. Proposed Rule 7211(b) requires the road authority to bear the cost of materials and labor to install crossing surfaces at new crossings, or when widening crossings, except for extensions of crossing surfaces to provide for sidewalks. Proposed Rule 7211(c) requires the road authority to bear the cost of construction traffic control for the installation of new crossings, widening of existing crossings, or maintenance, repair, or replacement of existing crossing surfaces. Railroads, railroad corporations, rail fixed guideway, transit agencies, and owners of track are required to provide sufficient advance notice and coordinate with road authorities to schedule and obtain necessary permits for such work. Proposed Rule 7211(h) adds fencing attached to

bridge structures as an option to providing protective covers over sidewalk and pathway crossings. Pathway crossing information is added throughout Rule 7211, and there are some other minor wording and word definition changes.

11. Crossing Safety Diagnostics and Cost Estimates

19. New proposed Rule 7212 adds rules regarding requirements for crossing safety diagnostics, requirements for a more timely provision of cost estimates to be included in applications, and requirements for applicants to work with Commission Staff on preemption timing calculations and four quadrant gate crossings.

12. Minimum Crossing Safety Requirements

20. Proposed Rule 7213 adopts the temporary rules regarding minimum crossing safety requirements adopted by the Commission in proceeding No. 16R-0674R effective September 7, 2016, and adds some additional minimum crossing safety requirements regarding use of pavement markings and requirements for crossings with limited storage distance.

13. Installation and Maintenance of Crossing Warning Devices

21. Proposed changes to Rule 7301 include clarifying rules that apply to both passive and active warning crossings, defining which entity is responsible for what maintenance, and clarifying that the rules apply to both highway-rail and pathway crossings.

14. Public Highway and Pathway Crossings

22. Proposed changes and additions to Rule 7327 include adding pathway crossings to the definition, changing references to street railroad to rail fixed guideway systems, and adding new minimum requirements for pathway crossings.

15. Other Proposed Rule Changes

23. There are proposed changes throughout the rules that provide minor wording and format changes that do not affect the content of these rules.

C. Conclusion

24. The statutory authority for the rules proposed here is found at §§ 24-4-101 *et seq.*; 40-1-103, 40-2-108, 40-2-119, 40-3-101, -102, -110, 40-4-101, -106, 40-5-102, -103, -105, -106, 40-6-108(2), and 40-29-110, C.R.S.

25. The proposed rules in legislative (i.e., ~~strikeout~~/underline) format (Attachment A) and final format (Attachment B) are available through the Commission's Electronic Filings (E-Filings) system at:

https://www.dora.state.co.us/pls/efi/EFI.Show_Docket?p_session_id=&p_docket_id=16R-0952R.

26. The Commission encourages and invites public comment on all proposed rules. We request that commenters propose any changes in legislative redline format.

27. This matter is referred to an Administrative Law Judge (ALJ) for the issuance of a recommended decision.

28. The ALJ will conduct a hearing on the proposed rules and related issues on January 30, 2017.

29. The Commission encourages interested persons to submit written comments before the hearing scheduled in this matter. In the event interested persons wish to file comments before the hearing, the Commission requests that comments be filed no later than January 17, 2017, and that any pre-filed comments responsive to the initial comments be submitted no later than January 23, 2017. The Commission prefers that comments be filed using its E-Filing System at <https://www.dora.state.co.us/pls/efi/EFI.homepage> in this proceeding. The Commission will consider all submissions, whether oral or written.

30. Interested persons may provide oral comments at the public hearing unless the ALJ deems oral presentations unnecessary.

II. ORDER

A. The Commission Orders That:

1. This Notice of Proposed Rulemaking (including Attachment A and Attachment B) attached hereto, shall be filed with the Colorado Secretary of State for publication in the December 25, 2016, edition of *The Colorado Register*.

2. This matter is referred to an Administrative Law Judge for the issuance of a recommended decision.

3. A hearing on the proposed rules and related matters shall be held as follows:

DATE January 30, 2017

TIME: 9:00 a.m. until not later than 5:00 p.m.

PLACE: Commission Hearing Room
1560 Broadway, Suite 250
Denver, Colorado

4. At the time set for hearing in this matter, interested persons may submit written comments and may present these orally unless the ALJ deems oral presentation unnecessary. The Commission prefers and encourages interested persons to pre-file comments through its E-Filing System at <https://www.dora.state.co.us/pls/efi/EFI.homepage> in this proceeding (16R-0952R).

5. Interested persons may file written comments in this matter. The Commission requests that initial pre-filed comments be submitted no later than January 17, 2017, and that any pre-filed comments responsive to the initial comments be submitted no later than January 23, 2017. The Commission will consider all submissions, whether oral or written.

6. This Decision is effective upon its Mailed Date.

BASIS, PURPOSE, AND STATUTORY AUTHORITY

The basis for and purpose of these rules is to describe the manner of regulation over railroads, railroad corporations, rail fixed guideways, rail fixed guideway systems, transit agencies, persons holding a certificate of public convenience and necessity to operate by rail, any other person operating by rail, governmental or quasi-governmental entities that own and/or maintain public highways at rail crossings, railroad peace officers, and to Commission proceedings concerning such entities. These rules address a wide variety of subject areas including, but not limited to, applications, petitions, annual reporting, formal and informal complaints, operating authority, transfers of operating authority, mergers, tariffs, crossings and warning devices, cost allocation for grade separations, crossing construction and maintenance, railroad clearances, system safety program standard for rail fixed guideway systems, and employment of railroad peace officers.

The statutory authority for the promulgation of these rules can be found at §§ 40-2-108, 40-2-119, 40-3-101(1), 40-3-102, 40-3-103, 40-3-110, 40-4-101(1), 40-4-101(2), 40-4-106, 40-5-105, 40-6-108(2), 40-6-111(3), 40-9-108(2), 40-18-102, 40-18-103, 40-29-110, and 40-32-108, C.R.S.

GENERAL PROVISIONS

7000. Scope and Applicability.

- (a) The rules in this Part 7, the "7000" series, apply to railroads, railroad corporations, rail fixed guideways, rail fixed guideway systems, transit agencies, persons holding a certificate of public convenience and necessity to operate by rail, any other person operating by rail, governmental or quasi-governmental entities that own and/or maintain public highways and/or public pathways at rail crossings, railroad peace officers, and to all Commission proceedings concerning such entities.
- (b) Except as otherwise required by law, the Commission's jurisdiction over rail fixed guideway systems ~~statutory transportation districts (e.g., Regional Transportation District)~~ shall be limited to matters concerning the following rules:
 - (I) 7001 – 7003;
 - (II) 7006 - 7007;
 - (III) 7200 – 72134;
 - (IV) 7301; and
 - (V) 7340 – 735449.
- (c) Specific applicability provisions are found in rules 7100, 7200, 7300, 7320, 7340, and 7400.

7001. Definitions.

The following definitions apply throughout this Part 7, except where a specific rule or statute provides otherwise:

- (a) "Common carrier" is defined by § 40-1-102(3)(a)(II), C.R.S.
- (b) "Rail fixed guideway" means any person possessing rail fixed guideway system facilities by ownership or lease.
- (c) "Rail fixed guideway system" means "rail fixed guideway system," as defined by § 40-18-101(3), C.R.S. Rail fixed guideway systems include "street railroads," "street railways," and "electric railroads," as those terms are used in Article 24 of Title 40, C.R.S.
- (d) "Railroad:"
 - (I) "Railroad" means either of the following, as the context may require:
 - (A) facilities, including without limitation: tracks; track roads; bridges used or operated in connection therewith; switches; spurs; and terminal facilities, freight depots, yards, and grounds, including rights-of-way, used or necessary for the transportation of passengers or property; or
 - (B) any person possessing such facilities by ownership or lease.
 - (II) "Railroad" does not include rail fixed guideways or rail fixed guideway systems.
- (e) "Railroad corporation" means five or more persons associating to form a company for the purpose of constructing and operating a railroad, in accordance with the provisions of § 40-20-101, C.R.S.
- ~~(f) "Road authority" means any municipality, county, state agency, federal agency, or other governmental or quasi-governmental entity that owns and/or maintains the public highway at the highway-rail crossing or the public pathway at the pathway crossing.~~
- ~~(gf) "Transit agency" means "transit agency," as defined by § 40-18-101(6), C.R.S.~~

7002. Applications.

- ~~(a) Commission action may be sought regarding any of the following matters through the filing of an appropriate application:
 - ~~(Ia) For a certificate of public convenience and necessity, as provided in rule 7101.~~
 - ~~(Iib) To amend a certificate of public convenience and necessity, or to change, extend, curtail, abandon, or discontinue any service, as provided in rule 7102.~~
 - ~~(IIIe) For authority to transfer a certificate of public convenience and necessity, to obtain a controlling interest in any utility, to transfer assets or stock, or to merge a utility with another entity, as provided in rule 7103.~~
 - ~~(IVe) For authority to construct, alter, or abolish a utility crossing, or a highway-rail or pathway crossing; or for authority to install or modify crossing warning devices, as provided in rule 7204.~~~~

- (Ve) ~~F~~or authority to allocate costs for highway-rail grade separations, as provided in rule 7205;
- (VIf) ~~F~~or approval of a transit agency's system safety program plan, as provided in rule 7343, ~~or~~ system security plan, as provided in rule 7344, or annual report, as provided in rule 7349; or
- (VIIg) ~~F~~or any other matter provided by statute or rule but not specifically described in this rule.

(b) In addition to the requirements of specific rules, all applications shall include, in the following order and specifically identified, the following information, either in the application or in appropriately identified attached exhibits:

- (I) the name and mailing address of the applicant;
- (II) if the applicant is a corporation or limited liability company; the name of the state in which the applicant is incorporated or organized and the location of its principal office, if any, in Colorado;
- (III) if the applicant is a partnership; the names, titles and addresses of all general and limited partners;
- (IV) the name, address, telephone number, and e-mail address of the applicant's representative to whom all inquiries concerning the application may be made;
- (V) a statement that the applicant agrees to respond to all questions propounded by the Commission or its staff concerning the application;
- (VI) a statement indicating the town or city, and any alternative town or city, where the applicant prefers any hearings to be held;
- (VII) a statement that the applicant understands that, if any portion of the application is found to be false or to contain material misrepresentations, any authorities granted pursuant to the application may be revoked upon Commission decision;
- (VIII) acknowledgment that by signing the application, the applicant understands that:
 - (A) the filing of the application does not by itself constitute approval of the application for the requested action;
 - (B) if the application is granted, the applicant shall not commence the requested action until the applicant complies with applicable Commission rules and any conditions established by Commission decision granting the application;
 - (C) if a hearing is held, the applicant must present evidence at the hearing to establish its qualifications to undertake, and its right to undertake, the requested action; and

(D) in lieu of the statements contained in subparagraphs (b)(VIII)(A) through (C) of this paragraph, an applicant may include a statement that it has read, and agrees to abide by, the provisions of subparagraphs (b)(VIII)(A) through (C) of this paragraph.

(IX) An attestation which is made under penalty of perjury; which is signed by an officer, a partner, an owner, an employee of, an agent for, or an attorney for the applicant, as appropriate, who is authorized to act on behalf of the applicant; and which states that the contents of the application are true, accurate, and correct. The application shall contain the title and the complete address of the affiant.

7003. Petitions.

Commission action may be sought regarding any of the following matters through the filing of an appropriate petition:

- (a) ~~F~~or a variance of any rule, as provided in rule 1003-; or
- (b) ~~F~~or a declaratory order, as provided in paragraph 1304(i).

7004. [Reserved].

7005. [Reserved].

7006. Annual Report.

- (a) Each railroad, railroad corporation, rail fixed guideway, transit agency and holder of a certificate of public convenience and necessity to operate by rail shall, on or before April 30th of each year, file an annual report for the preceding calendar year. The annual report shall be submitted on forms prescribed by the Commission. The annual report shall be verified and signed by a person authorized to do so. Submission of a federal R-1 form in lieu of the form prescribed by the Commission shall be sufficient as long as a Colorado supplement containing apportioned Colorado information is also filed.
- (b) If the railroad, railroad corporation, rail fixed guideway, transit agency or holder of the certificate of public convenience and necessity publishes an annual report or annual statistical report for the federal government, a federal agency, stockholders, other security holders, or members, or receives an annual report from a certified public accountant, it shall file a copy of such report(s) within 30 days after publication or receipt. It shall also include a Colorado-specific supplement detailing Colorado revenues.
- (c) If the railroad, railroad corporation, rail fixed guideway, transit agency or holder of the certificate of public convenience and necessity is granted an extension of time to file its annual report, it must nevertheless file, on or before April 30th, its total gross operating revenue from intrastate business transacted in Colorado for the preceding calendar year.
- (d) The annual report shall disclose the method of depreciation used.

7007. Formal and Informal Complaints.

Formal and informal complaints may be filed or made pursuant to the Commission's Rules Regulating Practice and Procedure.

7008. Incorporation by Reference.

The Commission incorporates by reference the Sections 1A.13, 4L.03, and 8 of the 2009 Edition of the Manual on Uniform Traffic Control Devices for Streets and Highways and the Colorado Supplement to the Federal Manual on Uniform Traffic Control Devices 2009 (collectively MUTCD) as adopted by the Transportation Commission of Colorado on December 15, 2011 and updated February 26, 2016. No later amendments to or editions of the MUTCD are incorporated into these rules. The Commission also incorporates by reference Chapter 1 (Highway Functions) of the 2011 edition of the American Association of State Highway and Transportation Officials A Policy on Geometric Design of Highways and Streets (AASHTO Green Book). No later amendments to or editions of the AASHTO Green Book are incorporated into these rules. The Commission also incorporates by reference the Colorado Department of Transportation Staff Bridge Design Manual adopted October 1987 with all updates up to and including the effective date of July 24, 2012 published by the Colorado Department of Transportation Staff Bridge Section (CDOT Bridge Design Manual). No later amendments to or editions of the CDOT Bridge Design Manual are incorporated into these rules. The Commission also incorporates by reference the National Electrical Safety Code, ~~C2-2010~~2012 edition, published by the Institute of Electrical and Electronics Engineers and endorsed by the American National Standards Institute. No later amendments to or editions of the National Electrical Safety Code are incorporated into these rules. Any person seeking information regarding how the incorporated material may be obtained or examined may contact the Director or his/her designee, Colorado Public Utilities Commission, 1560 Broadway, Suite 250, Denver, Colorado 80202. The material incorporated by reference may be examined at any state publications depository library.

7009. – 7099. [Reserved].

OPERATING AUTHORITY

7100. Applicability.

Rules 7101 through 7104 apply to all common carriers that:

- (a) operate on intrastate lines that are not connected to the interstate system of lines;
- (b) are not railroad corporations; and
- (c) do not operate under authority from the United States Surface Transportation Board.

7101. Certificate Applications.

An application for the issuance of a certificate of public convenience and necessity, including authority for approval of the exercise of franchise rights, must include all of the following information, as applicable:

- ~~(a) The applicant's name and complete physical and mailing addresses.~~

- (~~ba~~) ~~The trade name under which the applicant's operations are being or will be conducted;~~_i
- (~~cb~~) ~~If the applicant is a corporation: the name of the state in which it is incorporated; the location of its principal office, if any, in Colorado; the names of its directors and officers; the name and address of its Colorado-Commission designated agent for service of process; and a certified copy of its certificate of good standing authorizing it to do business in Colorado, certified within 14 days prior to the filing of the application. If the applicant does not possess authority qualifying it to do business in Colorado, the applicant shall:~~
- (I) acknowledge that the Commission will not grant the application without such authority;_i
and
- (II) file such authority as soon as possible.
- (~~cc~~) If the applicant is a limited liability company: a statement of that fact; ~~the name of the state in which it is organized; the complete mailing address and physical address of its principal office;~~ the name of its managers; and a certified copy of its certificate of good standing authorizing it to do business in Colorado, certified within 14 days prior to the filing of the application. If the applicant does not possess authority qualifying it to do business in Colorado, the applicant shall:
- (I) acknowledge that the Commission will not grant the application without such authority;_i
and
- (II) file such authority as soon as possible.
- (~~cd~~) If the applicant is a partnership: ~~the names, titles, and addresses of all general and limited partners; and~~ a copy of the partnership agreement establishing the partnership and all subsequent amendments;_i
- (~~f~~) ~~The name, address, telephone number, facsimile number, and e-mail address of the applicant's representative to whom all inquiries concerning the application may be made.~~
- (~~ce~~) ~~A~~ statement describing the authority sought, or franchise rights proposed to be exercised. The statement shall include a description of the type of utility service to be rendered and a description of the area sought to be served. The statement also shall include a description of applicant's existing operations and general service area;_i
- (~~cf~~) ~~A~~ statement describing in detail the extent to which the applicant is affiliated with any other company and the extent to which the applicant, or any person affiliated with applicant, holds authority duplicating in any respect the authority sought;_i
- (~~cg~~) ~~A~~ copy of the applicant's most recent balance sheet, covering a period ending not earlier than six months before the date of the filing of the application;_i
- (~~ch~~) ~~S~~statements of income and retained earnings, if available, for the same time period as the balance sheet referred to in paragraph (~~ig~~) of this rule;_i

- (ki) ~~A~~ statement disclosing whether the applicant or any affiliate of the applicant is currently in violation of any provision of Title 40, C.R.S., or any Commission rule or order. The disclosure, if applicable, shall include a description of the violations-;
- ~~(l) A statement that the applicant understands it must present evidence at the hearing to show its qualifications to conduct the operations proposed in the application.~~
- (mj) ~~A~~ statement of the facts (not conclusory statements) relied upon by the applicant to show that the public safety, convenience and necessity require the granting of the application-; and
- (nk) ~~W~~here the application is to exercise franchise rights: a certified copy of the franchise ordinance; and proof of publication, adoption, and acceptance by the applicant.
- ~~(o) A statement indicating the town or city where the applicant prefers any hearing regarding the application to be held, as well as any alternative choices.~~
- ~~(p) A statement indicating the applicant's understanding that the mere filing of the application does not, by itself, constitute authority to operate.~~
- ~~(q) A verified statement or affidavit, signed by an officer, partner, or owner, as applicable, who is authorized to act on behalf of the applicant, stating that the contents of the application and supporting documentation are true, accurate, and correct.~~

7102. Revocation or Amendment of Certificate; Changing, Extending, Curtailing, Abandoning, or Discontinuing Service.

- (a) The Commission may, after at least ten days' notice to the common carrier, hold a hearing to revoke, alter, or amend said common carrier's certificate of public convenience and necessity for any of the following reasons:
 - (I) ~~F~~ailure to comply with any statutory requirement;
 - (II) ~~F~~ailure to comply with the terms and conditions of, or exceeding the authority granted in, the certificate of public convenience and necessity; or
 - (III) ~~F~~ailure to comply with any lawful order, rule, or regulation of the Commission.
- (b) Except as provided in paragraph (c) of this rule, an application to amend a certificate of public convenience and necessity, or to change, extend, curtail, abandon, or discontinue any service, must contain all of the information required ~~under by paragraph 7002(b) and~~ rule 7101.
- (c) ~~For a~~Applications to curtail or abandon any service, ~~or and for~~ applications to in any manner restrict a certificate of public convenience and necessity must include all of the information in paragraph 7002(b) and the following information:
 - (I) ~~The applicant shall indicate~~ the requested effective date for the curtailment, abandonment, or restriction-;

- (II) ~~The applicant's response to paragraph 7101(g) shall contain~~ a statement describing the curtailment, abandonment, or restriction sought. The statement shall include maps, as applicable. The statement shall also include a description of the applicant's existing operations and general service area; ~~and~~
 - ~~(III) — The applicant need not respond to paragraph 7101(h).~~
 - ~~(IV) — The applicant's response to paragraph 7101(i) shall contain a statement that the applicant understands it must present evidence at the hearing showing how the public interest will be affected by the grant of the application.~~
 - ~~(V) — The applicant's response to paragraph 7101(p) shall contain a statement indicating the applicant's understanding that the mere filing of the application does not, by itself, constitute authority to curtail or abandon any service, or to restrict a certificate of public convenience and necessity.~~
 - ~~(VIII)~~ In addition to the notice requirements of the Rules Regulating Practice and Procedure, the applicant shall prepare a written notice as provided in subparagraph ~~(VII)~~ of this paragraph and shall mail or deliver the notice at least 30 days before the application's requested effective date to the Board of County Commissioners of each affected county, and to the mayor of each affected city, town, or municipality.
 - ~~(VII)~~ The notice of subparagraph ~~(VIII)~~ of this paragraph shall contain all of the following:
 - (A) ~~The~~ name of the applicant;:
 - (B) ~~A~~ statement detailing the requested curtailment, abandonment, or restriction, and its requested effective date;:
 - (C) ~~A~~ statement indicating that any person may file a written objection with the Commission no later than ten days prior to the requested effective date; but that a written objection alone will not preserve any right to participate as a party in any Commission proceeding on the matter;:
 - (D) ~~A~~ statement indicating that in order for any person to participate as a party, such person must file an appropriate and timely intervention according to the Commission's Rules Regulating Practice and Procedure; ~~and~~
 - (E) ~~The~~ Commission's full mailing address.
 - ~~(VIII)~~ ~~P~~prior to 15 days before the requested effective date, the applicant shall file with the Commission a written affidavit stating its compliance with the notice requirements of subparagraphs ~~(VIII)~~ and ~~(VII)~~ of this paragraph. The affidavit shall state the date the notice was completed and the method used to give notice. The applicant shall attach a copy of the notice to the affidavit.
- (d) No proposed amendment, change, extension, curtailment, or abandonment shall be effective unless and until the Commission has entered an order approving it.

7103. Transfers, Mergers, and Encumbrances.

- (a) For purposes of this rule, "transferee" means any entity newly acquiring control of operations under a certificate of public convenience and necessity.
- (b) An application to transfer or encumber a certificate of public convenience and necessity, to obtain a controlling interest in any utility, to transfer assets or stock, or to merge a utility with another entity, shall take the form of a joint application if possible, and must include all of the information in paragraph 7002(b) and the following:
- (I) ~~E~~each applicant's name, trade name if applicable, physical address, and mailing address;
 - ~~(II) The name, address, telephone number, facsimile number, and e-mail address of the applicant's representative to whom all inquiries concerning the application may be made.~~
 - (II~~I~~) Aa statement detailing the purpose of the application; and
 - (III~~V~~) ~~I~~n the case of an application to transfer a certificate of public convenience and necessity, to obtain a controlling interest in any utility, or to merge a utility with another entity:
 - (A) ~~T~~he transferee's most recent balance sheet, covering a period ending not earlier than six months before the date of the filing of the application;
 - (B) ~~T~~he transferee's statements of income and retained earnings, if available, for the same time period as provided by subparagraph (III~~V~~)(A); and
 - (C) ~~T~~he transferee's statement that it understands it must present evidence at the hearing to show its qualifications to operate under the certificate of public convenience and necessity.
 - (IV) A statement disclosing whether any applicant or any affiliate of an applicant is currently in violation of any provision of Title 40, C.R.S., or any Commission rule or order. The disclosure, if applicable, shall include a description of the violations;
 - (V~~I~~) ~~Copies of~~ any agreement or contract and all documents pertaining to the transfer, encumbrance, or merger;
 - (VI~~I~~) ~~F~~acts showing that the transfer, encumbrance, or merger is in the public interest, and an evaluation of the benefits and detriments, if any, to the customers of each party and to all other persons who will be affected by the transaction; and
 - (VII~~I~~) Aa comparison of the kinds and costs of service rendered before and after the proposed transaction.
 - ~~(IX) A statement indicating the town or city where the applicant(s) prefer(s) any hearing regarding the application to be held, and any alternative choices.~~

~~(X) — A verified statement or affidavit, signed by an officer, partner, or owner of each applicant, as applicable, who is authorized to act on behalf of the applicant, stating that the contents of the application and supporting documentation are true, accurate, and correct.~~

- (c) When control of a utility is transferred to another utility, or the name is changed, the utility that will afterwards operate under the certificate shall file an adoption notice with the Commission and have the adoption notice available for public inspection at each local office. Adoption notice forms are available from the Commission. The adoption notice shall contain all of the following information:
- (I) ~~The~~ name, phone number, and complete address of the adopting utility;
 - (II) ~~The~~ name of the previous utility;
 - (III) ~~The~~ number of the tariff adopted, and the description or title of the tariff adopted; and
 - (IV) A statement that the adopting utility is making its own all rates, rules, terms, conditions, agreements, concurrences, instruments, and all other provisions that have been filed or adopted by the previous utility.
- (d) Upon approval of a transfer application, the transferor and transferee shall file an acceptance of transfer form, which form shall be provided by the Commission. The form shall be signed by both parties, indicating acceptance of the terms and conditions of the Order authorizing the transfer. The acceptance of transfer shall contain a statement indicating that the transferee has complied with all provisions of the agreement of sale, lease, or other transfer.
- (e) A transferee shall not begin operations until after the Commission has advised the transferee that it is in compliance with all requirements and is authorized to begin operations.
- (f) A transferor shall not cancel its tariffs until the Commission has approved the transfer, the transferee has filed all required documents in the transferee's own name, and the Commission has advised the transferee that it is authorized to begin operations.

7104. – 7199. [Reserved].

CROSSINGS AND WARNING DEVICES

7200. Applicability.

- (a) Rules 7201 through 721~~3~~4 apply to railroads, railroad corporations, rail fixed guideways, rail fixed guideway systems and transit agencies.
- (b) Rules 7201 through 721~~3~~4 apply to all road authorities governmental or quasi-governmental entities that own and/or maintain public highways at highway-rail crossings or public pathways at pathway crossings.

7201. Definitions.

The following definitions apply only in the context of rules 7200 through 721~~3~~4, 7301, and 7327.

- (a) "Accident report" means the U.S. Department of Transportation Highway-Rail Grade Crossing Accident/Incident Report containing information about accidents/incidents that have occurred at a highway-rail or pathway grade crossing available from the Federal Railroad Administration Office of Safety Analysis.
- (b) "Active warning" means traffic control devices and equipment that are activated upon the detected presence of a train including but not limited to, flashing light signals, with or without warning gates, traffic signals, queue cutter signals, wayside horns, and/or blank-out signals that are used to regulate, warn and inform highway or pathway users of the approach or presence of rail traffic at-grade crossings.
- (c) "Advance preemption" means "advance preemption" as that term is defined in Section 1A.13 of the MUTCD.
- (d) "Advance preemption time" means the period of time that is the difference between the required maximum highway traffic signal preemption time and the activation of the railroad or rail fixed guideway system active warning devices.
- (e) "Advance warning sign" means a MUTCD W10-1, W10-2, W10-3, and/or W10-4 sign that gives notice to highway and/or pathway users of the presence of an upcoming crossing.
- (f) "ADT" means average daily traffic.
- (g) "Arterial" means "arterial," as that term is used in Chapter 1 (Highway Functions: ~~Systems and Classifications~~) of the AASHTO Green Book2001 edition of A Policy on Geometric Design of Highways and Streets, published by the American Association of State Highway and Transportation Officials.
- (h) "Buffer time" means a discretionary time that may be provided in the total warning time to accommodate for minor variations in train handling, track circuit variability and allowable tolerance within locomotive speed measurement apparatus.
- (i) "Clear storage distance" means "clear storage distance" as that term is defined in Section 1A.13 of the MUTCD.
- (j) "Clearance time" means additional time included in the total warning time to account for crossing site specific needs including, but not limited to, widths at multiple track crossings, additional gate delay time, and additional time for simultaneous preemption.
- (k) "Collector" means "collector," as that term is used in Chapter 1 (Highway Functions: ~~Systems and Classifications~~) of the AASHTO Green Book2001 edition of A Policy on Geometric Design of Highways and Streets, published by the American Association of State Highway and Transportation Officials.
- (l) "Crossing" means either a highway-rail crossing or a pathway crossing.

- (m) “Crossing safety diagnostic” means a gathering of safety and traffic professionals at an existing or proposed highway-rail or pathway crossing including Commission staff and representatives from the road authority and railroad, railroad corporation, rail fixed guideway, transit agency, or owner of the track to evaluate the highway-rail crossing or pathway crossing conditions or proposed conditions and determine the appropriate safety mitigation measures for the existing or proposed highway-rail or pathway crossing.
- (n) “Cycle length” means “cycle length” as that term is defined in Section 1A.13 of the MUTCD.
- (o) “Dynamic envelope” means “dynamic envelope” as that term is defined in Section 1A.13 of the MUTCD.
- (p) “Dynamic exit gate operating mode” means “dynamic exit gate operating mode” as that term is defined in Section 1A.13 of the MUTCD.
- (q) “Equipment response time” means the time necessary for the active warning equipment to respond to detection of a train.
- (r) “Exit gate clearance time” means “exit gate clearance time” as that term is defined in Section 1A.13 of the MUTCD.
- (sd) "Exposure factor" means the ADT multiplied by the average daily number of train movements.
- (te) "Freeway" means “interstate highway,” “other freeway,” and “expressway” as those terms are used in Chapter 1 (Highway Functions: ~~Systems and Classifications~~) of the AASHTO Green Book 2001 edition of *A Policy on Geometric Design of Highways and Streets*, published by the American Association of State Highway and Transportation Officials.
- (u) "Highway" means any roadway classified as an arterial, collector, freeway or local road.
- (vf) "Highway-rail crossing" means:
- (I) the point at which any public highway may be constructed across the tracks or other facilities of any railroad, railroad corporation, ~~railroad~~, ~~or~~ rail fixed guideway, rail fixed guideway system, or transit agency at, above, or below grade; or
 - (II) the point at which the tracks or other facilities of any railroad, railroad corporation, ~~railroad~~, ~~or~~ rail fixed guideway, rail fixed guideway system, or transit agency may be constructed across any public highway at, above, or below grade; or
 - (III) the point at which any public highway may be constructed across private tracks, over which any railroad, railroad corporation, ~~railroad~~, rail fixed guideway, rail fixed guideway system, or transit agency may operate, at, above, or below grade; or
 - (IV) the point at which private tracks, over which any railroad, railroad corporation, ~~railroad-rail fixed guideway, rail fixed guideway system,~~ or transit agency may operate, may be constructed across any public highway at, above, or below grade.

- (w) “Local road” means “local road” as that term is used in Chapter 1 (Highway Functions) of the 2011 edition of the AASHTO Green Book.
- (x) “Maximum highway traffic signal preemption time” means “maximum highway traffic signal preemption time” as that term is defined in Section 1A.13 of the MUTCD.
- (y) “Minimum track clearance distance” means “minimum track clearance distance” as that term is defined in Section 1A.13 of the MUTCD.
- (z) “Minimum warning time” means the least amount of time active warning devices shall operate prior to the arrival of rail traffic at a crossing, which shall be a minimum of 20 seconds.
- (aa) “National Inventory Form” means the U.S. Department of Transportation Crossing Inventory Information form containing specific crossing information available from the Federal Railroad Administration Office of Safety Analysis.
- (bb) “National Inventory Number” means the U.S. Department of Transportation six digit and one letter crossing identification number assigned to a highway-rail or pathway crossing.
- (cc) “Passive warning” means traffic control devices including signs and/or markings that are used to inform, regulate and warn highway or pathway users of the presence of a highway-rail or pathway crossing and the requirement to take appropriate action at the crossing.
- (dd) “Pathway” means a general term denoting a public way for purposes of travel by authorized users outside the traveled way and physically separated from a highway by an open space or barrier, either within the highway right-of-way or within an independent alignment. Pathways include shared-use paths, but do not include sidewalks contiguous with, or separated but adjacent to highway-rail crossings.
- (ee) “Pathway crossing” means:
- (I) the point as which any public pathway may be constructed across the tracks or other facilities of any railroad, railroad corporation, rail fixed guideway, rail fixed guideway system, or transit agency at, above, or below grade; or
 - (II) the point at which the tracks or other facilities of any railroad, railroad corporation, railroad, rail fixed guideway, rail fixed guideway system, or transit agency may be constructed across any public pathway at, above, or below grade; or
 - (III) the point at which any public pathway may be constructed across private tracks, over which any railroad, railroad corporation, rail fixed guideway, rail fixed guideway system, or transit agency may operate, at, above, or below grade; or
 - (IV) the point at which private tracks, over which any railroad, railroad corporation, rail fixed guideway, rail fixed guideway system, or transit agency may operate, may be constructed across any public pathway at, above, or below grade.
- (ff) “Pavement marking” means a retroreflectorized white marking in advance of an at-grade crossing that consists of an X, the letters RR as shown in Figure 8B-7 of the MUTCD.

(gg) "Private crossing" means a highway-rail or pathway crossing where the highway or pathway on either side or both sides of the crossing is privately owned, and/or maintained, is intended for use by the owner or by the owner's licenses and invitees, and is not permitted to be used by the public.

(hh) "Public crossing" means a highway-rail or pathway crossing where the highway or pathway on both sides of the crossing is under the jurisdiction of and/or maintained by a road authority.

(ig) "Reasonably adequate facility," except as may be otherwise demonstrated, means:

(I) for a highway facility:

(A) Aa rural collector roadway that allows for two 12-foot travel lanes with two 5-foot shoulders; or

(B)(H) Aa rural arterial roadway that allows for two 12-foot travel lanes with two 8-foot shoulders and an 8-foot pedestrian-bikeway; or

(C)(H) Aa urban collector roadway that allows for two 12-foot travel lanes with two 10-foot parking lanes and an 8-foot pedestrian-bikeway; or

(D)(V) Aa urban arterial roadway that allows for four 12-foot travel lanes with an 11-foot median and an 8-foot pedestrian-bikeway on one side; and

(E) collector roadways shall be designed for a 35 mile per hour design speed and arterial roadways shall be designed for a 45 mile per hour design speed;

(VII) for a railroad facility:

(A) Aa single main line track that allows for mainline track, one passing track on 15-foot centers and a 12-foot maintenance road under bridge structures on one side, or a 4-foot walkway on bridge structures on one side; or

(B)(V) Aa double mainline track that allows for two mainline tracks and one passing track on 15-foot centers and a 12-foot maintenance road under bridge structures on one side, or a 4-foot walkway on bridge structures on one side; and

(C)(VII) Rr railroad yards or terminals that allow for currently existing tracks and service facilities.

(jj) "Right-of-way transfer time" means "right-of-way transfer time" as that term is defined in Section 1A.13 of the MUTCD.

(kk) "Rural" means "rural" as that term is used in Chapter 1 (Highway Functions) of the AASHTO Green Book.

(ll) "Separation time" means "separation time" as that term is defined in Section 1A.13 of the MUTCD.

- (mm) "Simultaneous preemption" means "simultaneous preemption" as that term is defined in Section 1A.13 of the MUTCD.
- (nn) "Theoretical structure" means the structure and approaches required to transition to the reasonably adequate facility in accordance with the design standards outlined in the CDOT Bridge Design manual and shall be designed to include the following requirements:
- (I) without consideration to the presence of other adjacent highway or waterway facilities located within the limits of the grade separation project that would also require a bridge structure;
 - (II) using the same selected structure and abutment type as the actual bridge structure;
 - (III) along the same alignment as the actual bridge structure;
 - (IV) to the same minimum horizontal and vertical clearances as the actual bridge structure; and
 - (V) to the CDOT Bridge Design Manual preliminary plan stage (30 percent design stage including construction design and phasing costs).
- (oo) "Timed exit gate operating mode" means "timed exit gate operating mode" as that term is defined in Section 1A.13 of the MUTCD.
- (pp) "Total warning time" means the sum of the minimum time, clearance time, and buffer time.
- (qq) "Urban" means "urban" as that term is used in Chapter 1 (Highway Functions) of the AASHTO Green Book.
- (rrh) "Utility crossing" means the point at which the tracks or facilities of any public utility may be constructed across the facilities of any other public utility at, above, or below grade, or at the same or different levels.

7202. ~~Incorporation by Reference~~[Reserved].

~~The Commission incorporates by reference Chapter 1 (Highway Functions: Systems and Classifications) of the 2001 edition of A POLICY ON GEOMETRIC DESIGN OF HIGHWAYS AND STREETS, published by the American Association of State Highway and Transportation Officials. No later amendments to or editions of the incorporated material are incorporated into these rules. Any person seeking information regarding how the incorporated material may be obtained or examined may contact the Director or his/her designee, Colorado Public Utilities Commission, 1560 Broadway, Suite 250, Denver, Colorado 80202. The material incorporated by reference may be examined at any state publications depository library.~~

7203. Who May Apply.

- (a) An application for authority to construct a ~~highway-rail~~ crossing where the highway or pathway currently exists may ~~only~~ be made by the railroad, railroad corporation, rail fixed guideway, transit agency, or other person, firm, or corporation that will own the tracks proposed to be constructed.

- (b) An application for authority to construct a ~~highway-rail~~ crossing where the tracks or other facilities currently exist may ~~only~~ be made by the appropriate ~~road authority~~ municipality, county, state agency, or other governmental entity.
- (c) An application for authority to alter or abolish a ~~highway-rail~~ crossing may ~~only~~ be made by the appropriate railroad, railroad corporation, ~~railroad~~, rail fixed guideway, or transit agency that owns the tracks at the crossing, or road authority ~~municipality, county, state agency, or other governmental entity.~~
- (d) An application for authority to install or modify ~~active warning or passive signal lights or other~~ warning devices may ~~only~~ be made by a railroad, railroad corporation, ~~railroad~~, rail fixed guideway, or transit agency that owns the tracks at the crossing, or road authority ~~municipality, county, state agency, or other governmental entity.~~ The Colorado Department of Transportation may make application for Federal Section 130 crossing projects in conjunction with, or on behalf of the road authority.
- (e) An application for authority to construct, alter or abolish a utility crossing may ~~only~~ be made by the appropriate public utility, railroad, railroad corporation, rail fixed guideway, transit agency or other person, firm, or corporation that will own or owns the tracks or other facilities proposed to be constructed.
- (f) An application for authority to install temporary safety measures in advance of an application to install or modify active warning or passive warning devices may ~~only~~ be made by a railroad, ~~corporation~~, railroad corporation, rail fixed guideway, transit agency, or road authority ~~municipality, county, state agency, or other governmental entity.~~ The Colorado Department of Transportation may make application for temporary safety measures for Federal Section 130 crossing projects in conjunction with, or on behalf of the road authority.

7204. Application Contents — Generally.

- ~~(a) — For purposes of this rule only, the Commission incorporates by reference Section 8A.01 of the 2003 Edition of the Manual on Uniform Traffic Control Devices for Streets and Highways and the Colorado Supplement to the Federal Manual on Uniform Traffic Control Devices 2003 as adopted by the Transportation Commission of Colorado on September 14, 2004. No later amendments to or editions of the Manual on Uniform Traffic Control Devices are incorporated into these rules. Any person seeking information regarding how the incorporated material may be obtained or examined may contact the Director or his/her designee, Colorado Public Utilities Commission, 1560 Broadway, Suite 250, Denver, Colorado 80202. The material incorporated by reference may be examined at any state publications depository library.~~
- ~~(b) — Any engineering schematics, plans, drawings, or maps submitted pursuant to this rule shall be submitted on pages no larger than 11" x 17".~~
- (ae) In the case of an application (other than to modify or replace the existing crossing surface without changing the width or configuration of a crossing) to construct, alter, or abolish a ~~utility~~ crossing, a ~~utility~~ highway-rail crossing, or to install or modify active or passive crossing warning devices, the application shall include, in the following order and specifically identified, the information, as applicable to the specific type of application, in the application or in appropriately identified attachments. ~~applicant shall submit the information required by this paragraph, to the extent~~

~~applicable, either in the application or in appropriately identified attached exhibits. If the applicant is unable to provide certain information required by this paragraph, or if the applicant believes certain required information is excessive compared to the scope of the proposed project, the applicant may omit the required information provided that the application specifically justifies the omission. If the applicant desires Commission approval of special application procedures not otherwise contemplated by this paragraph (e.g., a design-build process or expedited approval), the application shall so state, shall specify the relief sought, and shall justify the request. Applications shall contain the following:~~

- ~~(I) All crossing and utility crossing applications shall contain the following information:~~
 - ~~(A) the contact person name, mailing address and e-mail address to whom the Commission notice is to be sent:
 - ~~(i) for each railroad, railroad corporation, rail fixed guideway, or transit agency that owns the tracks affected by an application filed by a road authority or utility;~~
 - ~~(ii) for each road authority that owns the roadway or the utility affected by the application filed by a railroad, railroad corporation, rail fixed guideway, transit agency, or other person, firm, or corporation that will own the tracks affected by the application;~~~~
 - ~~(B) the railroad and/or rail fixed guideway line name and milepost number where the crossing that is subject of the application is located;~~
 - ~~(C) the National Inventory Number and the National Inventory Form for an existing crossing, or a statement that no National Inventory Number and/or National Inventory Form exists for a new crossing;~~
 - ~~(D) all accident reports for the crossing and/or a listing of all accidents for any rail fixed guideway tracks through the crossing, or a statement that no accident reports and/or listing of rail fixed guideway accidents exist for the crossing;~~
 - ~~(E) a statement of the date that the required crossing safety diagnostic occurred, or a copy of written correspondence from Commission staff that a crossing safety diagnostic was not required;~~
 - ~~(F) a statement of:
 - ~~(i) the existing number and character of trains (e.g., through movements, switching movements) passing through the crossing each day if the National Inventory Form has not been updated within three years from the date of the filing of the application, or the existing number, character, and timetable speed of trains as shown on the National Inventory Form if the form has been updated within three years from the date of the filing of the application;~~~~

- (ii) the five-year projection of increases or decreases of the number and character of trains using the crossing; and
 - (iii) the maximum timetable speed of trains using the crossing;
 - (G) a detailed statement as to the nature of and need for the construction, alteration, abolition, installation, or modification for which approval is sought;
 - (H) a statement of the scope of the project, including without limitation:
 - (i) the highway design, pathway design, crossing warning devices, and necessary traffic signal interconnection and preemption;
 - (ii) the detailed itemized estimated cost of the proposed construction, alteration, abolition, or highway-rail or pathway crossing warning device installation or modification;
 - (iii) how applicant proposes to provide for the cost, explaining the proposed apportionment between or among the parties in interest if applicable; and
 - (iv) if the funds necessary for the project are currently available and encumbered;
 - (I) a statement of the estimated month and year for:
 - (i) the start date for the construction, alteration, abolition, or crossing warning device installation or modification;
 - (ii) the completion date for the construction, alteration, abolition, or crossing warning device installation or modification;
 - (iii) the date for commencement of operations through the crossing for new crossings;
 - (J) a vicinity map that includes the proposed project limits (i.e., a map that includes the general area circumscribing the project);
 - (K) the names and mailing addresses of all persons, including adjacent property owners, public utilities, and local government agencies that may be interested in or affected by the application; and
 - (L) if the crossing is at-grade: a statement fully justifying why a separation of grades is not practicable under the circumstances.
 - (M) for highway-rail crossings a statement of:

- (i) the existing ADT volume and character of vehicles (including, but not limited to percentage of heavy vehicles and number of school buses) passing through the highway-rail crossing each day if the traffic volume on the National Inventory Form has not been updated within three years from the date of the filing of the application, or the existing ADT volume and character of vehicles passing through the highway-rail crossing each day as shown on the National Inventory Form if the traffic volume on the form has been updated within three years from the date of the filing of the application;
 - (ii) the five-year and twenty-year ADT volume projections of vehicles using the highway-rail crossing; and
 - (iii) the posted or unposted speed limit for the vehicles traveling through the highway-rail crossing.
 - (N) for pathway crossings a statement of:
 - (i) the existing or estimated number of pedestrians and bicycles passing through the pathway crossing each day and a statement if the number is based on an actual count or an estimate; and
 - (ii) the five-year and twenty-year projections of the number of pedestrians and bicycles using the pathway crossing.
- (II) Applications for new at-grade crossing shall include:
 - (A) detailed final plans/drawings of a suitable scale, showing the at-grade crossing, including signing and striping, tracks, buildings, structures, property lines, and public highways within the right-of-way limits of the railroad, railroad corporation, rail fixed guideway, rail fixed guideway system, or transit agency;
 - (B) a final profile drawing showing grade lines and proposed grade lines of approaches on the public highway or pathway, and the tracks being crossed that may be affected by the proposed or existing crossing;
 - (C) proposed roadway classification (e.g. local road, collector, arterial, freeway) and a cross-section drawing of the road authority's standards for that roadway classification or cross-section drawing of the pathway;
 - (D) the following documentation for all existing crossings within one-mile of the proposed location of the new crossing in urban locations or within towns, or the two crossings nearest the proposed crossing in rural locations:
 - (i) the National Inventory Number and National Inventory Form;
 - (ii) all accident reports or a statement that no accident reports are available; and

(iii) the existing ADT volume and character of vehicles (including, but not limited to, percentage of heavy vehicles and number of school buses) passing through the highway-rail crossing each day if the traffic volume on the National Inventory Form has not been updated within three years from the date of the filing of the application, or the existing ADT volume and character of vehicles passing through the highway-rail crossing each day as shown on the National Inventory Form if the traffic volume on the form has been updated within three years from the date of the filing of the application.

(III) Applications to widen, narrow, or relocate an existing crossing shall include:

- (A) detailed final plans/drawings of a suitable scale, showing the grade crossing, including signing and striping, tracks, buildings, structures, property lines, and public highways within the right-of-way limits of the railroad, railroad corporation, rail fixed guideway, rail fixed guideway system, or transit agency;
- (B) a final profile drawing showing grade lines and proposed grade lines of approaches on the public highway or pathway and the tracks being crossed that may be affected by the proposed or existing crossing;
- (C) existing roadway classification (e.g. local, collector, arterial, freeway) and a cross-section drawing of the roadway authority's standards for that roadway classification or cross-section drawing of the pathway; and
- (D) proposed roadway classification (e.g. local road, collector, arterial, freeway) and a cross-section drawing of the roadway authority's standards for that roadway classification or cross-section drawing of the pathway;

(IV) Applications to close a crossing by removal of the tracks shall include:

- (A) detailed final plans/drawings of a suitable scale showing the details of the crossing closure plan;
- (B) a copy of the notice of proposed closure of the crossing as required under paragraph 7208(c); and
- (C) traffic volumes required under (I)(H) are not required.

(V) Applications to close a crossing by removal of the roadway or pathway shall include:

- (A) the following documentation for all existing crossings within one-mile of the proposed location of the crossing to be closed in urban locations or within towns, or the two crossings nearest the proposed crossing to be closed in rural locations:
 - (i) the National Inventory Number and National Inventory Form;
 - (ii) all accident reports or a statement that no accident reports are available;

- (iii) the existing ADT volume and character of vehicles (including, but not limited to, percentage of heavy vehicles and number of school buses) passing through the highway-rail crossing each day if the traffic volume on the National Inventory Form has not been updated within three years from the date of the filing of the application, or the existing ADT volume and character of vehicles passing through the highway-rail crossing each day as shown on the National Inventory Form if the traffic volume on the form has been updated within three years from the date of the filing of the application;
 - (B) detailed final plans/drawings of a suitable scale showing the details of the crossing closure plan; and
 - (C) the notice of proposed closure of the crossing as required under paragraph 7208(c).
- (VI) Applications to install or change passive warning devices at crossings shall include:
 - (A) a description of the type of warning device the applicant proposes to install; and
 - (B) the detailed railroad cost estimate of the crossing warning devices;
- (VII) Applications for installation of new active warning devices, replacement of existing active warning devices, or replacement of existing train detection circuitry at crossings shall include:
 - (A) detailed final plans/drawings of a suitable scale, showing the crossing, including signing and striping, tracks, buildings, structures, property lines, and public highways within the right-of-way limits of the railroad, railroad corporation, rail fixed guideway, rail fixed guideway system, or transit agency;
 - (B) a description of the type of warning devices the applicant proposes to install (reference may be made to recommended standards on highway-rail grade crossing warning devices as published in current editions of the MUTCD and/or the American Railway Engineering and Maintenance-of-Way Association's Signal Manual of Recommended Practice);
 - (C) the detailed railroad cost estimate of the crossing warning devices; and
 - (D) the schematic diagram of the crossing warning devices (commonly referred to as the "front sheet") and shall specifically identify the equipment response time, advanced preemption time, minimum warning time, clearance time, buffer time, and total warning time.
- (VIII) Applications involving installation of four quadrant gate active warning devices shall include:
 - (A) a description of the type of four quadrant exit gate operating mode proposed (e.g., timed, dynamic exit gate vehicle detection, or timed/dynamic combination);

- (B) for timed exit gate operating mode, the proposed exit gate clearance time, a description of the methodology used to determine the exit gate clearance time and the calculations performed to determine the exit gate clearance time;
 - (C) for dynamic exit gate operating mode, a description of the type of vehicle detection proposed, a plan drawing showing the proposed vehicle detector placement(s) and description and timings of how the vehicle detection will operate; and
 - (D) a letter of concurrence from Commission staff regarding the proposed four-quadrant operations and timings;
- (IX) Applications involving interconnection to traffic signals or queue cutter signals and preemption by active warning signals shall include:
- (A) a statement of the proposed preemption operations (e.g., simultaneous, advanced);
 - (B) the traffic signal timings, including:
 - (i) the traffic signal cycle length;
 - (ii) minimum green time for each signal phase and pedestrian phase;
 - (iii) green times for each signal phase;
 - (iv) yellow change times for each signal phase;
 - (v) red clearance times for each signal phase;
 - (vi) walk times for each pedestrian phase;
 - (vii) flashing don't walk times for each pedestrian phase;
 - (viii) the traffic signal phasing diagram including the preemption sequence; and
 - (ix) a statement of whether and what type of gate down circuitry will be used;
 - (C) a list of and calculations for the following distances and timings:
 - (i) minimum track clearance distance;
 - (ii) design vehicle designation and length;
 - (iii) clear storage distance;
 - (iv) preemption delay time;

- (v) controller response time to preemption call;
 - (vi) worst case conflicting vehicle time and worst case conflicting pedestrian time;
 - (vii) maximum highway traffic signal preemption time;
 - (viii) right-of-way transfer time;
 - (ix) queue clearance time;
 - (x) clearance time;
 - (xi) separation time;
 - (xii) advance preemption time;
 - (xiii) minimum warning time; and
- (D) a letter of concurrence from Commission staff regarding the proposed preemption operations and timings.
- (X) Applications requesting cost allocation to the Highway-Rail Crossing Signalization Fund or Federal Section 130 Fund shall contain specific information regarding the requested apportionment of costs between the railroad, railroad corporation, rail fixed guideway, rail fixed guideway system, or transit agency, the road authority, and the Highway-Rail Crossing Signalization Fund or Federal Section 130 Fund.
- (XI) Applications to change an existing crossing from a public crossing to a private crossing shall include:
- (A) the following documentation for all existing crossings within one-mile of the proposed location of the new crossing in urban locations or within towns, or the two crossings nearest the proposed crossing in rural locations:
 - (i) the National Inventory Number and National Inventory Form;
 - (ii) copies of all accident reports or a statement that no accident reports are available for those crossings;
 - (iii) the existing ADT volume and character of vehicles passing through the highway-rail crossing each day if the traffic volume on the National Inventory Form has not been updated within three years from the date of the filing of the application, or the existing ADT volume and character of vehicles passing through the highway-rail crossing each day as shown on the National Inventory Form if the traffic volume on the form has been updated within three years from the date of the filing of the application;

(B) documentation (ordinance, ruling, etc.) showing that the road authority agency is proposing to remove the road from its network of ownership, operation, and maintenance; and

(C) documentation showing the person that will be owning, operating, and maintaining the private roadway.

(XII) Applications to change an existing crossing from a private crossing to a public crossing shall include:

(A) proposed roadway classification (e.g. local road, collector, arterial, freeway) and a cross-section drawing of the road authority's standards for that roadway classification or cross-section of the pathway;

(B) a statement that the existing crossing meets the standards of the proposed roadway classification or a statement that the roadway will be changed to meet the current roadway classification standards;

(C) documentation (ordinance, ruling, etc.) showing that the road authority is accepting the road into its network for ownership, operation, and maintenance.

(XIII) Applications to construct a grade separated crossing shall include:

(A) detailed final plans/drawings of a suitable scale, showing the crossing, including signing and striping, tracks, buildings, structures, property lines, and public highways within the right-of-way limits of the railroad, railroad corporation, rail fixed guideway, rail fixed guideway system, or transit agency;

(B) a final profile drawing showing grade lines and proposed grade lines of approaches on the public roadway, highways, streets, or pathways and the tracks being crossed that may be affected by the proposed or existing crossing;

(C) final bridge plan drawings that show, at a minimum:

(i) the total length of the bridge structure;

(ii) the length of each individual span for multiple span bridge structures;

(iii) the location of all existing and any possible proposed future tracks in relation to the bridge structure;

(iv) the minimum vertical clearance from the top of rail or pavement to the bottom of structure;

(v) the minimum horizontal clearance from centerline of track to face of pier or abutment if track is under the bridge structure; and

(vi) the cross-section of the bridge showing information regarding the roadway, pathway or railroad configuration including, but not limited to, out-to-out distance, fencing, lane widths, walkway widths and median widths.

(XIV) Applications for a utility crossing shall include:

(A) detailed final plans/drawings of a suitable scale, showing the utility crossing, tracks, buildings, structures, and property lines within the right-of-way limits of the railroad, railroad corporation, rail fixed guideway, rail fixed guideway system, or transit agency; and

(B) a final profile drawing showing grade lines and proposed grade lines of the utility in relation to the tracks being crossed.

~~(I) the applicant's name and mailing address;~~

~~(II) if the applicant is a corporation or limited liability company: the name of the state in which the applicant is incorporated or organized and the location of its principal office, if any, in Colorado;~~

~~(III) if the applicant is a partnership: the names and addresses of all general and limited partners;~~

~~(IV) the name, address, telephone number, facsimile number, and e-mail address of the applicant's representative to whom all inquiries concerning the application may be made;~~

~~(V) the U.S. Department of Transportation National Inventory Number of the crossing, the railroad or rail fixed guideway milepost, and the roadway milepost;~~

~~(VI) a detailed statement as to the nature of and need for the construction, alteration, abolition, installation, or modification for which approval is sought;~~

~~(VII) a statement of:~~

~~(A) the existing number, character, and timetable speed of trains and vehicles passing the crossing each day, and~~

~~(B) the five-year projection, and the ten-year or twenty-year projections if available, of increases or decreases of the number, character, and speed of such trains and vehicles, if any;~~

~~(VIII) a statement of the scope of the project, including without limitation:~~

~~(A) highway design, crossing warning devices, and traffic signal interconnection and preemption;~~

~~(B) the itemized estimated cost of the proposed construction, alteration, abolition, or crossing warning device installation or modification; and~~

- ~~(C) — how applicant proposes to provide for the cost, explaining the proposed apportionment between or among the parties in interest if applicable;~~
- ~~(IX) — in the case of an application for the installation or modification of crossing warning devices, a statement describing the type of crossing warning devices the applicant proposes to install (reference may be made to recommended standards on highway-rail grade crossing warning devices as published in current revisions of the Manual on Uniform Traffic Control Devices and/or American Railway Engineering and Maintenance-of-Way Association's Signal Manual of Recommended Practice);~~
- ~~(X) — a statement of the estimated start and completion dates for the construction, alteration, abolition, or crossing warning device installation or modification, and a statement of the estimated date for crossing's commencement of operation;~~
- ~~(XI) — a vicinity map that includes the proposed project limits (i.e., a map that includes the general area circumscribing the project);~~
- ~~(XII) — detailed plans/drawings of a suitable scale, showing the grade crossing, including signing and striping, tracks, buildings, structures, property lines, and public highways within the right-of-way limits of the railroad, railroad corporation, or rail fixed guideway;~~
- ~~(XIII) — a profile drawing showing grade lines and proposed grade lines of approaches on the public roads, highways, streets railroads, or rail fixed guideway systems that may be affected by the proposed or existing highway-rail crossing;~~
- ~~(XIV) — the schematic diagram of the crossing warning devices (commonly known as the "front sheet");~~
- ~~(XV) — in the case of an application to install or modify interconnection and preemption at a highway traffic signal:
 - ~~(A) — the traffic signal timings (e.g. signal cycle length, yellow change, red clearance) and traffic signal phasing diagram including preemption sequence;~~
 - ~~(B) — a statement of the type of preemption (e.g. simultaneous, advance)~~
 - ~~(C) — an analysis of the following timings as defined in Section 8A.01 of the Manual on Uniform Traffic Control Devices;
 - ~~(i) — the maximum highway traffic signal preemption time;~~
 - ~~(ii) — the right-of-way transfer time;~~
 - ~~(iii) — the queue clearance time;~~
 - ~~(iv) — the separation time;~~
 - ~~(v) — the minimum warning time — through train movements;~~~~~~

- ~~(vi) — the advance preemption time, if applicable;~~
 - ~~(vii) — the exit gate clearance time (required for four-quadrant gate systems only); and~~
 - ~~(viii) — any additional timings the Commission may request.~~
 - ~~(XVI) — the names and mailing addresses of all persons, including adjacent property owners, public utilities, municipalities, counties, and state that may be interested in or affected by the application;~~
 - ~~(XVII) — if the crossing is at grade: a statement fully justifying why a separation of grades is not practicable under the circumstances;~~
 - ~~(XVIII) — a statement that the applicant agrees to respond to all questions propounded by the Commission or its Staff concerning the application;~~
 - ~~(XIX) — a statement indicating the town or city, and any alternate town or city, where the applicant prefers any hearings to be held; and~~
 - ~~(XX) — a sworn statement verifying and attesting to the facts stated in the application as described in rule 1403(a).~~
- (b) Any engineering schematics, plans, drawings, or maps submitted pursuant to this rule shall be submitted on pages no larger than 11" x 17". All engineering schematics, plans, drawings and maps must be legible. All plan and profile drawings submitted must be able to be printed to and measured by the identified scale.
- (c) If the applicant adopts a substantive change to any map, drawing, plan, or schematic that has been filed with the application, the applicant shall file the new map, drawing, plan, or schematic within ten days of the change. In all cases, the applicant shall submit final maps, drawings, plans, or schematics, as applicable, within ten days of the availability of such final maps, drawings, plans, and schematics.
- (d) An application filed pursuant to paragraph 7203(f), ~~that application~~ may only be filed subsequent to discussion of the proposed temporary safety measure and consensus of a diagnostic team consisting of the road authority, the railroad, railroad corporation, ~~or~~ rail fixed guideway, or transit agency, Commission staff, and the Colorado Department of Transportation if the project is a for Section 130 projects ~~of the proposed temporary safety measure~~. The application shall contain the information required by paragraphs 7002(b), and paragraphs 7204(a)(I)(A-E, F(i), G, H(i-iv), I-L, M(i)) following information listed above in paragraph 7204(c) including 7204(c)(I, II, III, IV, V, VI, VII(A), VII(A-C), X, XI, XVI, XVII, XIX, XX, and a copy of the diagnostic notes including a list of all in attendance, a statement of the temporary safety measure being sought, and a statement that the diagnostic team is in consensus of the proposed temporary safety measure being sought. Notice of ~~this an~~ application is provided pursuant to paragraph 720803(d).

7205. Additional Application Contents for Cost Allocation Requests in Grade Separation Applications.

- (a) Any engineering schematics, plans, drawings, or maps submitted pursuant to this rule shall be submitted on pages no larger than 11" x 17". All engineering schematics, plans, drawings and maps must be legible. All plan and profile drawings submitted must be able to be printed to and measurable by the identified scale.
- (b) In the case of applications concerning highway-rail grade separations for which contribution from one or more railroad corporations is requested, the applicant shall, in addition to the information required by paragraph 7204(a), ~~as applicable~~ include the following additional information in the application in the following order and specifically identified either in the application or in appropriately identified attachments:
- (I) a complete description of the scope of the proposed separation project;
 - (II) a preliminary set of construction plans, including engineering costs;
 - (III) a preliminary engineer's cost estimate, including engineering costs;
 - (IV) the estimated costs of right-of-way, parcel by parcel, including railroad right-of-way;
 - (V) a proposed construction timetable;
 - (VI) a list of affected railroad corporations;
 - (VII) a preliminary design of the theoretical structure for a reasonably adequate facility; and
 - (VIII) a cost estimate of the theoretical structure, including the costs described in subparagraphs (III) and (IV) of this paragraph and including a 20 percent contingency.

7206. Grade Separations — Minimum Criteria for Cost Allocation Consideration.

- (a) For a highway-rail grade separation application to be considered for cost allocation, the following minimum criteria shall be met:
- (I) ~~E~~exposure factor, actual or projected, shall exceed 8~~7~~5,000 at urban locations and 35,000 at rural locations;
 - (II) ~~T~~he roadway shall be a collector, arterial, or freeway with an actual or no greater than five-year projected ADT traffic-volume of 65,000 ADT-vehicles per day or greater for urban locations or 2,500 ADT-vehicles per day or greater for rural locations; and
 - (III) ~~A~~ny rail lines shall have an actual or projected volume of four train movements per day or greater.
- (b) The Commission may consider other locations for cost allocation, if warranted by unusual conditions or circumstances.

7207. Cost Allocation for Grade Separation.

- (a) Upon receipt of an application for a highway-rail grade-separation project, which application meets the criteria of rule 7206, the Commission shall allocate the costs of right-of-way acquisition, engineering, and construction of the ~~theoretical structure minimum project~~ that separates a reasonably adequate ~~highway road-way~~ facility from a reasonably adequate railroad facility. The Commission shall impose allocation of costs in the following manner:
- (I) Except as provided in subparagraph (II) of this paragraph, 50 percent of the cost shall be borne by the railroad corporation or corporations and 50 percent of the cost shall be borne by the State, County, Municipality, or public authority in interest.
 - (II) Notwithstanding subparagraph (I) of this paragraph, the Commission may impose a different allocation if demonstrated by evidence of benefit and need. Among other things, the Commission shall consider whether piers or abutments of a roadway overpass hinder the construction of future additional rail lines within the railroad right-of-way and whether the projected life of the overpass structure exceeds the anticipated construction date of the additional rail lines.
- (b) The Commission may determine whether to treat the replacement or realignment of existing grade separations as if there were an at-grade crossing requiring separation. The Commission may determine whether to treat grade separation of roadways on a new alignment as if there were an existing at-grade crossing requiring separation.
- (c) The Commission shall order the total allocation of grade separation expenses and allocation of expenses by year to a railroad through Commission Decision for the approved grade separation project. The Commission shall allocate and track expenses for the approved grade separation project by railroad starting in the first calendar year in which allocation dollars are available, and for each successive calendar year until the total cost of the grade separation project has been fully allocated to the railroad. Total tracked expenditures for a single calendar year shall not exceed two million five hundred thousand dollars per railroad.

7208. Notice.

The Director shall give notice of any application filed under rules 7204 and/or 7205. The Director shall ~~mail provide~~ said notice to all persons who, in the opinion of the Commission, would be interested in or affected by the grant or denial of the application, including those interested persons the applicant lists in its application.

- (a) The notice ~~mailed provided~~ by the Commission shall take the form of a Notice and Order, and shall contain the following information in addition to the information required by ~~paragraph rule~~ 1206(b):
- (I) ~~The~~ the name of the applicant;
 - (II) ~~The~~ the ~~proceeding docket~~ number assigned to the application;
 - (III) ~~The~~ the application's caption, which shall include the crossing's designation, if any;

- (IV) ~~T~~he date of the notice;
 - (V) Aa statement that any person desiring to participate as a party in any proceedings to be held must file an appropriate intervention as required under the Commission's Rules Regulating Practice and Procedure;
 - (VI) ~~T~~he date by which interventions must be filed which shall ordinarily be not less than 30 days after mailing of the notice;
 - (VII) Aa statement regarding whether the application has been deemed complete as of the date of the notice;
 - (VIII) Aa statement that the Commission may, without a hearing, issue an order granting or denying the application, if no intervention contesting the application has been timely filed;
 - (IX) Aa statement that if a hearing regarding the application is set, the parties will be notified of the setting; that applicants must appear at the hearing to present evidence in support of the application; and that other parties may appear to present evidence in support of their positions;
 - (X) Aa statement that, unless previously filed, the applicant shall either file through the E-Filings System or shall file an original and three copies of its list of witnesses and an original and three copies of its ~~exhibits-attachments~~ at least 20 days prior to the first day of hearing; and that the applicant shall serve each party with its list of witnesses and copies of its ~~exhibitsattachments~~;
 - (XI) Aa statement that each intervenor shall either file through the E-Filings System or shall file an original and three copies of its list of witnesses and an original and three copies of its ~~exhibits-attachments~~ at least ~~ten~~10 days prior to the first day of hearing; and that each intervenor shall serve each party with its list of witnesses and copies of its ~~exhibitsattachments~~; and
 - (XII) Aany other information that the Commission deems appropriate.
- (b) Where the application is for authority to install or modify crossing warning devices under § 40-4-106(2)(b), C.R.S., the notice shall state, in addition to the requirements of paragraph (a) of this rule, that the question of how costs will be borne and paid will be considered at and determined as a result of the hearing.
- (c) Where the application is for authority to close a ~~highway-rail~~ crossing, the applicant shall give notice by posting notice of the closing on both sides of the trackage of the crossing proposed to be closed and the Commission shall mail notice to the affected parties listed in the application. The posting of notice at the crossing and the Commission notice shall occur on the same day. The notice shall be posted at the crossing and the Commission shall mail the Notice of Application Filed 15 days after the application is filed with the Commission, unless the 15th day falls on a weekend or holiday in which case the notice shall be posted on the last business day prior to the weekend or holiday. The Commission shall mail the Notice of Application Filed 15 days after receiving the application. The notice is to be posted at the crossing for a period of

30 days. The applicant shall file a written affidavit stating the date the notice was posted at the crossing and shall attach a copy of the notice posted at the crossing to the affidavit.

- (I) The notice shall contain, at a minimum, the following information:
 - (A) ~~T~~he title: Notice of Proposed Closing of This Crossing;
 - (B) ~~A~~ statement that an application to close the crossing has been filed with the Colorado Public Utilities Commission;
 - (C) ~~T~~he current correct address of the Commission;
 - (D) ~~T~~he date the closing of the crossing is requested;
 - (E) ~~T~~he ~~U.S. DOT~~ National ~~Crossing~~ Inventory ~~N~~umber of the crossing;
 - (F) ~~A~~ sufficient description of the crossing so as to identify it, ~~and~~ the ~~proceeding Docket N~~umber assigned to the application;
 - (G) ~~A~~ statement that parties have the right to file written interventions or objections with the Commission at the address stated on the notice; and
 - (H) ~~A~~ statement of the last date for filing interventions or objections.
 - (II) The notice must meet the following requirements:
 - (A) ~~T~~he posted notice to close the crossing shall be printed on a substantial placard, no less than 18" x 24";
 - (B) ~~T~~he title: Notice of Proposed Closing of This Crossing shall be printed in letters no less than one inch in height;
 - (C) ~~A~~ll other information printed on the notice shall be in letters no smaller than one half inch in height;
 - (D) ~~T~~he background of the notices shall be white; and
 - (E) ~~T~~he letters of the notice shall be black.
 - (III) The notices shall be posted so as to be clearly visible from a distance of no less than 100 feet from the notice, and shall not be posted so as to obstruct the vision of motorists or trains at the crossing.
- (d) The Commission shall give 14 days' notice of the filing of an application made pursuant to paragraph 7203(f).

7209. Uncontested Applications.

Except as provided by § 40-4-106(2)(b), C.R.S., an uncontested and unopposed application may be processed as such under the Commission's Rules Regulating Practice and Procedure.

7210. Failure to Provide Required Information.

If an application does not provide the information required by rules 7204 and 7205, as applicable, the Commission may summarily dismiss the application and close the proceeding docket.

7211. Crossing Construction and Maintenance.

- (a) A railroad, railroad corporation, rail fixed guideway, transit agency, or owner of the track shall maintain the grade crossing surface from the outside end of the tie to the outside end of the tie at single track crossings. ~~The roadway authority shall bear the cost of materials to maintain, repair, or replace the crossing surface.~~ The railroad, railroad corporation, rail fixed guideway, transit agency, or owner of the track shall bear the cost of materials and labor to installation, maintenance, repair, or replacement an existing of the crossing surface. Railroads, railroad corporations, rail fixed guideways, transit agencies, and owners of the track shall promptly assist any roadway authority to the extent required to maintain the roadway surface between tracks at multiple track crossings. The road authority shall bear the cost of railroad flagging required to maintain the roadway surface between tracks at multiple track crossings.
- (b) The road authority shall bear the cost of materials and labor to install crossing surfaces at a new crossing or to widen the highway portion of an existing crossing including the cost of highway and/or pathway construction traffic control. Extensions of crossing surfaces for the addition of sidewalks to an existing crossing require only the addition of crossing surface panels for the sidewalks and do not require the entire crossing surface to be replaced.
- (c) The road authority shall bear the cost of highway and/or pathway construction traffic control for installation of any new crossings, widening of existing crossings, or maintenance, repair, or replacement of existing crossing surfaces. Railroads, railroad corporations, rail fixed guideways, transit agencies, or owners of the track shall provide sufficient advance notice and coordinate with the road authority regarding any necessary permits and to schedule highway and/or pathway construction traffic control for installation of any new crossings, widening of existing crossings, or maintenance, repair, or replacement of existing crossing surfaces.
- (db) The crossing surface shall be of plank, concrete, rubber, flangeway and asphalt, or other suitable material that is compatible with the highway approaches, and shall be of the same width as the pavement or other surfacing material in the approaches of the adjacent highway including the roadway shoulders. The crossing surface material shall make a reasonably smooth riding surface over the track or tracks and be approximately level with the top of the rails. Wherever practicable, the tracks at multiple track crossings shall be level with the mainline track.
- (ee) The road authority~~governmental or quasi-governmental entity~~ that owns the highway shall maintain at its own expense the highway approaches up to the outside end of the ties.

- ~~(d) Whenever a grade crossing is widened the governmental or quasi-governmental entity that owns the highway shall pay the cost of the highway improvement, including the highway approaches and the initial cost of the necessary crossing surface extension.~~
- (fe) Whenever a track is constructed at, or removed from a ~~highway-rail~~ crossing, the owner of the track shall pay the cost of the track construction or removal, including the crossing surface, ~~and the highway and/or pathway approaches, and highway and/or pathway construction traffic control.~~
- (gf) Wherever practicable, sidewalks and/or bike paths should be detached from the curb and constructed behind the crossing signal mast. The crossing surface material for said sidewalks and/or bike paths need not be continuous with the crossing surface material of the vehicle travel lanes.
- ~~(hg) Except at locations of existing highway-rail grade crossings, Pathways sidewalk and/or bike path crossings of mainline trackage shall be grade separated. Rail fixed guideway and rail fixed guideway systems are exempted from this requirement. Sidewalks or pathway and/or bike path crossings under railroad open deck bridges or trestles shall have a protective cover (roof) extending a reasonable distance beyond the edges of the bridge or trestle to prevent material or debris from striking users of the sidewalk or pathway crossings. Sidewalks and pathway crossings under closed deck bridges may have either a protective cover extending a reasonable distance beyond the edges of the bridge or may have fencing attached to the bridge structure to prevent material or debris from striking users of the sidewalk or pathway crossing.~~
- (ih) Every railroad, railroad corporation, rail fixed guideway, transit agency, or owner of the track, at all points in Colorado where its tracks cross ~~at grade~~ any public highway ~~or public pathway at grade~~, shall remove all obstructions along the tracks that block the view of motorists, ~~bicycles, and/or pedestrians~~ as outlined in ~~rule paragraph~~ 7301(c). The Commission may determine what obstructions are to be removed to secure reasonable safety.
- (ji) The Commission may determine the materials to be used in a crossing at the time the Commission considers the application regarding the crossing.

7212. ~~[Reserved].~~ Crossing Safety Diagnostics and Cost Estimates.

- ~~(a) A railroad, railroad corporation, rail fixed guideway, transit agency, owner of the track, road authority, or Commission staff may request a crossing safety diagnostic at any existing or proposed crossing to assess the condition of the existing crossing, to discuss proposed changes to an existing crossing, or to discuss a proposed new crossing. A crossing safety diagnostic must be held at least 30 days prior to the filing of an application for a new crossing, for changes to an existing crossing, or for closure of an existing crossing. If the railroad, railroad corporation, rail fixed guideway, transit agency, owner of the track, road authority, and Commission staff determine jointly that a crossing safety diagnostic for a specific project for which an application will be sought is not necessary, Commission staff shall provide written correspondence to the railroad, railroad corporation, rail fixed guideway, transit agency, owner of the track, and road authority memorializing such determination for use in any future application.~~

- (b) The railroad, railroad corporation, rail fixed guideway, transit agency, or owner of the track is required to provide any requested cost estimate including a detailed itemized estimate of costs and necessary schematic diagrams for any passive warning devices, active warning devices, and/or crossing surface estimates for new crossings or crossings proposed to be widened within 60 days of the written request by the road authority requesting such cost estimate. The road authority is required to copy Commission staff on any requested cost estimates from the railroad, railroad corporation, rail fixed guideway, transit agency, or owner of the track. If the railroad, railroad corporation, rail fixed guideway, transit agency, or owner of the track fails to provide the requested cost estimate within 60 days of such request, the road authority may provide an estimate of the costs for any proposed passive warning devices, active warning devices, and/or crossing surface estimates as part of the application, and the railroad, railroad corporation, rail fixed guideway, transit agency, or owner of the track from which the estimate was originally requested will be held to the cost estimate plus no more than ten percent over the road authority provided estimate regardless of the actual cost of the required work.
- (c) Commission staff will be required to assist, review and concur with any proposed simultaneous or advance preemption timings at crossings for which interconnection and preemption exists or will be requested, and with proposed exit gate operations and timings at crossings for which four-quadrant gate systems exist or are proposed to be installed. Commission staff's assistance, review, and concurrence must occur at least 30 days prior to the filing of the application.

7213. Minimum Crossing Safety Requirements.

- (a) All public crossings in the state of Colorado shall have posted, at a minimum, one ~~Manual on Uniform Traffic Control Devices (MUTCD)~~ R15-1 crossbuck sign, one MUTCD R15-2P number of tracks sign for crossings with more than one track, and one MUTCD R1-2 yield sign, mounted on the same support, for each direction of vehicle and/or pedestrian traffic that crosses the tracks. Any signage configuration different from these minimum standards require approval from the Commission through the filing and granting of an application.
- (b) All public crossings shall have posted, at a minimum, one advance warning sign applicable to the roadway geometry posted for each direction of traffic that crosses the tracks. Applicable advance warning signs include MUTCD signs W10-1, W10-2, W10-3, and W10-4. The road authority may install warning beacons on advance warning signs in accordance with Section 4L.03 of the MUTCD.
- (c) All public highway-rail crossings where the measured storage distance between the dynamic envelope of the crossing and the stop bar location for the intersection downstream from the crossing is less than 80 feet shall post in advance of the highway-rail crossing a MUTCD W10-11 storage space sign with a MUTCD W10-11a supplemental word message storage distance sign indicating the length of storage between the dynamic envelope and the stop bar for the highway.
- (d) Highway-rail grade crossing pavement markings shall be installed on all paved approach lanes to the highway-rail grade crossing for roadways with a posted or statutory speed limit of 40 miles per hour or greater. Highway-rail grade crossing pavement markings should be installed on all paved approach lanes to highway-rail grade crossings for roadways with a posted or statutory speed limit of less than 40 miles per hour. Grade crossing pavement markings may be installed on all approaches to a pathway crossing. Pavement markings shall be installed only on approach lanes where all vehicles will cross the crossing.

721~~42~~. – 7299. [Reserved].

SAFETY

Generally

7300. Applicability.

Rules 7301 through 7302 apply to all railroads, railroad corporations, rail fixed guideways, and transit agencies. Additionally, rule 7302 applies to common carriers.

7301. Installation and Maintenance of Crossing Warning Devices.

- (a) All passive and active crossing warning devices, whether electrically operated or otherwise, and of whatsoever nature, which have been installed at public highway-rail crossings in the state of Colorado, shall be installed, and efficiently maintained and kept in good condition or good operating condition by the railroad, railroad corporation, rail fixed guideway, transit agency, or entity owning the track at the crossing at the railroad, railroad corporation, rail fixed guideway, rail fixed guideway system, transit agency, or owner of the track's expense for the life of the crossing.
- (b) Whenever active crossing warning devices are interconnected to standard highway traffic signals, the highway traffic signal shall be efficiently maintained and kept in good operating condition by the road authority agencypublic highway authority in interest at the road authority's expense for the life of the crossing.
- ~~(c) All advance warning signs and pavement markings which have been installed at public crossings in the state of Colorado shall be efficiently maintained and kept in good condition by the road authority owning and maintaining the roadway at the crossing at the road authority's expense for the life of the crossing.~~
- ~~(de) Every person to whom this rule applies shall at all times keep its right-of-way free and clear from all obstructions which substantially interfere with the safe sight distance of approaching trains at highway-rail crossings; provided, however, that:
 - (I) ~~T~~his paragraph (ed) shall not apply to existing buildings, permanent structures, and natural obstructions other than trees and vegetation-;
 - (II) ~~T~~his paragraph (ed) shall not apply to rolling stock or materials temporarily on the right-of-way in connection with switching movements or with the loading or unloading of shipments-;
 - (III) ~~T~~his paragraph (ed) shall not apply to highway-rail crossings at which automatic signals and gates are installed. The exception provided by this subparagraph (III) shall only be applicable if such automatic signals and gates are kept free and clear of all obstructions interfering with either:
 - (A) the operation of the automatic signals and gates; or~~

(B) the ability of drivers to detect the automatic signals and gates.

(ed) No grain elevators, storage tanks, warehouses or other buildings which substantially obstruct the view of approaching trains at crossings shall be built on the right-of-way unless and until the railroad complies with any requirements which the Commission may impose as to signals or other safety installation in connection with such obstruction.

[indicates omission of unaffected rules]

7327. Public ~~Roads, Highways, and Street and Pathway~~ Crossings.

- (a) Where a public ~~road, highway, or street or pathway~~ crosses above any railroad or ~~street railroad rail fixed guideway system~~ track used or proposed to be used for transporting freight cars ~~or passenger cars~~, minimum overhead and side clearances as set forth in this rule must be observed.
- (b) Overhead clearances.
- (I) Where a railroad or ~~street railroad rail fixed guideway system~~ crosses above any public ~~road, highway or street~~, a minimum overhead clearance of 14'0" shall be provided above the surface of such ~~road, highway, or street~~.
- (II) Where a railroad or ~~a street railroad rail fixed guideway system~~ crosses any public highway of the State Highway System or any Federal Aid Highway, a minimum overhead clearance of 16'0" shall be provided above the surface of such highway ~~or street~~.
- (III) Where a railroad or rail fixed guideway system crosses above any public pathway, a minimum overhead clearance of 10'0" shall be provided above the surface of such pathway.
- (c) Minimum opening clearances.
- (I) Where a railroad or ~~street railroad rail fixed guideway system~~ crosses above any public ~~road, highway, or street~~ on a single supporting span, a minimum width of 26'0" shall be provided for the opening for such ~~public road, highway, or street~~.
- (II) Where a railroad or ~~street railroad rail fixed guideway system~~ crosses any public highway of the State Highway System, or any Federal Aid Highway, on a single supporting span, a minimum width of 30'0" shall be provided for the opening of such highway ~~or street~~.
- (III) Where two or more supporting spans are used for such an opening, the minimum widths specified in subparagraphs (I) and (II) of this paragraph shall be provided for each of such supporting spans.

(IV) Where a railroad or rail fixed guideway system crosses above any public pathway, on a single supporting span, a minimum width of 8'0" shall be provided for the opening of the pathway if the pathway is for pedestrian use only, and a minimum width of 12'0" shall be provided for the opening of the pathway if the pathway is a shared use pathway for pedestrian and bicycle use.

BASIS, PURPOSE, AND STATUTORY AUTHORITY

The basis for and purpose of these rules is to describe the manner of regulation over railroads, railroad corporations, rail fixed guideways, rail fixed guideway systems, transit agencies, persons holding a certificate of public convenience and necessity to operate by rail, any other person operating by rail, governmental or quasi-governmental entities that own and/or maintain public highways at rail crossings, railroad peace officers, and to Commission proceedings concerning such entities. These rules address a wide variety of subject areas including, but not limited to, applications, petitions, annual reporting, formal and informal complaints, operating authority, transfers of operating authority, mergers, tariffs, crossings and warning devices, cost allocation for grade separations, crossing construction and maintenance, railroad clearances, system safety program standard for rail fixed guideway systems, and employment of railroad peace officers.

The statutory authority for the promulgation of these rules can be found at §§ 40-2-108, 40-2-119, 40-3-101(1), 40-3-102, 40-3-103, 40-3-110, 40-4-101(1), 40-4-101(2), 40-4-106, 40-5-105, 40-6-108(2), 40-6-111(3), 40-9-108(2), 40-18-102, 40-18-103, 40-29-110, and 40-32-108, C.R.S.

GENERAL PROVISIONS

7000. Scope and Applicability.

- (a) The rules in this Part 7, the "7000" series, apply to railroads, railroad corporations, rail fixed guideways, rail fixed guideway systems, transit agencies, persons holding a certificate of public convenience and necessity to operate by rail, any other person operating by rail, governmental or quasi-governmental entities that own and/or maintain public highways and/or public pathways at rail crossings, railroad peace officers, and to all Commission proceedings concerning such entities.
- (b) Except as otherwise required by law, the Commission's jurisdiction over rail fixed guideway systems shall be limited to matters concerning the following rules:
 - (I) 7001 – 7003;
 - (II) 7006 - 7007;
 - (III) 7200 – 7213;
 - (IV) 7301; and
 - (V) 7340 – 7354.
- (c) Specific applicability provisions are found in rules 7100, 7200, 7300, 7320, 7340, and 7400.

7001. Definitions.

The following definitions apply throughout this Part 7, except where a specific rule or statute provides otherwise:

- (a) "Common carrier" is defined by § 40-1-102(3)(a)(II), C.R.S.

- (b) "Rail fixed guideway" means any person possessing rail fixed guideway system facilities by ownership or lease.
- (c) "Rail fixed guideway system" means "rail fixed guideway system," as defined by § 40-18-101(3), C.R.S. Rail fixed guideway systems include "street railroads," "street railways," and "electric railroads," as those terms are used in Article 24 of Title 40, C.R.S.
- (d) "Railroad:"
 - (I) "Railroad" means either of the following, as the context may require:
 - (A) facilities, including without limitation: tracks; track roads; bridges used or operated in connection therewith; switches; spurs; and terminal facilities, freight depots, yards, and grounds, including rights-of-way, used or necessary for the transportation of passengers or property; or
 - (B) any person possessing such facilities by ownership or lease.
 - (II) "Railroad" does not include rail fixed guideways or rail fixed guideway systems.
- (e) "Railroad corporation" means five or more persons associating to form a company for the purpose of constructing and operating a railroad, in accordance with the provisions of § 40-20-101, C.R.S.
- (f) "Road authority" means any municipality, county, state agency, federal agency, or other governmental or quasi-governmental entity that owns and/or maintains the public highway at the highway-rail crossing or the public pathway at the pathway crossing.
- (g) "Transit agency" means "transit agency," as defined by § 40-18-101(6), C.R.S.

7002. Applications.

- (a) Commission action may be sought regarding any of the following matters through the filing of an appropriate application:
 - (I) for a certificate of public convenience and necessity, as provided in rule 7101;
 - (II) to amend a certificate of public convenience and necessity, or to change, extend, curtail, abandon, or discontinue any service, as provided in rule 7102;
 - (III) for authority to transfer a certificate of public convenience and necessity, to obtain a controlling interest in any utility, to transfer assets or stock, or to merge a utility with another entity, as provided in rule 7103;
 - (IV) for authority to construct, alter, or abolish a utility crossing, or a highway-rail or pathway crossing; or for authority to install or modify crossing warning devices, as provided in rule 7204;
 - (V) for authority to allocate costs for highway-rail grade separations, as provided in rule 7205;

- (VI) for approval of a transit agency's system safety program plan, as provided in rule 7343, system security plan, as provided in rule 7344, or annual report, as provided in rule 7349; or
 - (VII) for any other matter provided by statute or rule but not specifically described in this rule.
- (b) In addition to the requirements of specific rules, all applications shall include, in the following order and specifically identified, the following information, either in the application or in appropriately identified attached exhibits:
- (I) the name and mailing address of the applicant;
 - (II) if the applicant is a corporation or limited liability company; the name of the state in which the applicant is incorporated or organized and the location of its principal office, if any, in Colorado;
 - (III) if the applicant is a partnership; the names, titles and addresses of all general and limited partners;
 - (IV) the name, address, telephone number, and e-mail address of the applicant's representative to whom all inquiries concerning the application may be made;
 - (V) a statement that the applicant agrees to respond to all questions propounded by the Commission or its staff concerning the application;
 - (VI) a statement indicating the town or city, and any alternative town or city, where the applicant prefers any hearings to be held;
 - (VII) a statement that the applicant understands that, if any portion of the application is found to be false or to contain material misrepresentations, any authorities granted pursuant to the application may be revoked upon Commission decision;
 - (VIII) acknowledgment that by signing the application, the applicant understands that:
 - (A) the filing of the application does not by itself constitute approval of the application for the requested action;
 - (B) if the application is granted, the applicant shall not commence the requested action until the applicant complies with applicable Commission rules and any conditions established by Commission decision granting the application;
 - (C) if a hearing is held, the applicant must present evidence at the hearing to establish its qualifications to undertake, and its right to undertake, the requested action; and
 - (D) in lieu of the statements contained in subparagraphs (b)(VIII)(A) through (C) of this paragraph, an applicant may include a statement that it has read, and agrees to abide by, the provisions of subparagraphs (b)(VIII)(A) through (C) of this paragraph.

- (IX) An attestation which is made under penalty of perjury; which is signed by an officer, a partner, an owner, an employee of, an agent for, or an attorney for the applicant, as appropriate, who is authorized to act on behalf of the applicant; and which states that the contents of the application are true, accurate, and correct. The application shall contain the title and the complete address of the affiant.

7003. Petitions.

Commission action may be sought regarding any of the following matters through the filing of an appropriate petition:

- (a) for a variance of any rule, as provided in rule 1003; or
- (b) for a declaratory order, as provided in paragraph 1304(i).

7004. [Reserved].

7005. [Reserved].

7006. Annual Report.

- (a) Each railroad, railroad corporation, rail fixed guideway, transit agency and holder of a certificate of public convenience and necessity to operate by rail shall, on or before April 30th of each year, file an annual report for the preceding calendar year. The annual report shall be submitted on forms prescribed by the Commission. The annual report shall be verified and signed by a person authorized to do so. Submission of a federal R-1 form in lieu of the form prescribed by the Commission shall be sufficient as long as a Colorado supplement containing apportioned Colorado information is also filed.
- (b) If the railroad, railroad corporation, rail fixed guideway, transit agency or holder of the certificate of public convenience and necessity publishes an annual report or annual statistical report for the federal government, a federal agency, stockholders, other security holders, or members, or receives an annual report from a certified public accountant, it shall file a copy of such report(s) within 30 days after publication or receipt. It shall also include a Colorado-specific supplement detailing Colorado revenues.
- (c) If the railroad, railroad corporation, rail fixed guideway, transit agency or holder of the certificate of public convenience and necessity is granted an extension of time to file its annual report, it must nevertheless file, on or before April 30th, its total gross operating revenue from intrastate business transacted in Colorado for the preceding calendar year.
- (d) The annual report shall disclose the method of depreciation used.

7007. Formal and Informal Complaints.

Formal and informal complaints may be filed or made pursuant to the Commission's Rules Regulating Practice and Procedure.

7008. Incorporation by Reference.

The Commission incorporates by reference the Sections 1A.13, 4L.03, and 8 of the 2009 Edition of the Manual on Uniform Traffic Control Devices for Streets and Highways and the Colorado Supplement to the Federal Manual on Uniform Traffic Control Devices 2009 (collectively MUTCD) as adopted by the Transportation Commission of Colorado on December 15, 2011 and updated February 26, 2016. No later amendments to or editions of the MUTCD are incorporated into these rules. The Commission also incorporates by reference Chapter 1 (Highway Functions) of the 2011 edition of the American Association of State Highway and Transportation Officials A Policy on Geometric Design of Highways and Streets (AASHTO Green Book). No later amendments to or editions of the AASHTO Green Book are incorporated into these rules. The Commission also incorporates by reference the Colorado Department of Transportation Staff Bridge Design Manual adopted October 1987 with all updates up to and including the effective date of July 24, 2012 published by the Colorado Department of Transportation Staff Bridge Section (CDOT Bridge Design Manual). No later amendments to or editions of the CDOT Bridge Design Manual are incorporated into these rules. The Commission also incorporates by reference the National Electrical Safety Code, 2012 edition, published by the Institute of Electrical and Electronics Engineers and endorsed by the American National Standards Institute. No later amendments to or editions of the National Electrical Safety Code are incorporated into these rules. Any person seeking information regarding how the incorporated material may be obtained or examined may contact the Director or his/her designee, Colorado Public Utilities Commission, 1560 Broadway, Suite 250, Denver, Colorado 80202. The material incorporated by reference may be examined at any state publications depository library.

7009. – 7099. [Reserved].

OPERATING AUTHORITY

7100. Applicability.

Rules 7101 through 7104 apply to all common carriers that:

- (a) operate on intrastate lines that are not connected to the interstate system of lines;
- (b) are not railroad corporations; and
- (c) do not operate under authority from the United States Surface Transportation Board.

7101. Certificate Applications.

An application for the issuance of a certificate of public convenience and necessity, including authority for approval of the exercise of franchise rights, must include all of the following information, as applicable:

- (a) the trade name under which the applicant's operations are being or will be conducted;
- (b) if the applicant is a corporation: the names of its directors and officers; the name and address of its Commission designated agent for service of process; and a certified copy of its certificate of good standing authorizing it to do business in Colorado, certified within 14 days prior to the filing of the application. If the applicant does not possess authority qualifying it to do business in Colorado, the applicant shall:

- (I) acknowledge that the Commission will not grant the application without such authority;
and
 - (II) file such authority as soon as possible.
- (c) If the applicant is a limited liability company: a statement of that fact; the name of its managers; and a certified copy of its certificate of good standing authorizing it to do business in Colorado, certified within 14 days prior to the filing of the application. If the applicant does not possess authority qualifying it to do business in Colorado, the applicant shall:
- (I) acknowledge that the Commission will not grant the application without such authority;
and
 - (II) file such authority as soon as possible.
- (d) If the applicant is a partnership: a copy of the partnership agreement establishing the partnership and all subsequent amendments;
- (e) a statement describing the authority sought, or franchise rights proposed to be exercised. The statement shall include a description of the type of utility service to be rendered and a description of the area sought to be served. The statement also shall include a description of applicant's existing operations and general service area;
- (f) a statement describing in detail the extent to which the applicant is affiliated with any other company and the extent to which the applicant, or any person affiliated with applicant, holds authority duplicating in any respect the authority sought;
- (g) the applicant's most recent balance sheet, covering a period ending not earlier than six months before the date of the filing of the application;
- (h) statements of income and retained earnings, if available, for the same time period as the balance sheet referred to in paragraph (g);
- (i) a statement disclosing whether the applicant or any affiliate of the applicant is currently in violation of any provision of Title 40, C.R.S., or any Commission rule or order. The disclosure, if applicable, shall include a description of the violations;
- (j) a statement of the facts (not conclusory statements) relied upon by the applicant to show that the public safety, convenience and necessity require the granting of the application; and
- (k) where the application is to exercise franchise rights: a certified copy of the franchise ordinance; and proof of publication, adoption, and acceptance by the applicant.

7102. Revocation or Amendment of Certificate; Changing, Extending, Curtailing, Abandoning, or Discontinuing Service.

- (a) The Commission may, after at least ten days' notice to the common carrier, hold a hearing to revoke, alter, or amend said common carrier's certificate of public convenience and necessity for any of the following reasons:

- (I) failure to comply with any statutory requirement;
 - (II) failure to comply with the terms and conditions of, or exceeding the authority granted in, the certificate of public convenience and necessity; or
 - (III) failure to comply with any lawful order, rule, or regulation of the Commission.
- (b) Except as provided in paragraph (c) of this rule, an application to amend a certificate of public convenience and necessity, or to change, extend, curtail, abandon, or discontinue any service, must contain all of the information required by paragraph 7002(b) and rule 7101.
- (c) Applications to curtail or abandon any service and applications to in any manner restrict a certificate of public convenience and necessity must include all of the information in paragraph 7002(b) and the following information:
- (I) the requested effective date for the curtailment, abandonment, or restriction;
 - (II) a statement describing the curtailment, abandonment, or restriction sought. The statement shall include maps, as applicable. The statement shall also include a description of the applicant's existing operations and general service area; and
 - (III) in addition to the notice requirements of the Rules Regulating Practice and Procedure, the applicant shall prepare a written notice as provided in subparagraph (IV) of this paragraph and shall mail or deliver the notice at least 30 days before the application's requested effective date to the Board of County Commissioners of each affected county, and to the mayor of each affected city, town, or municipality.
- (IV) The notice of subparagraph (III) of this paragraph shall contain all of the following:
- (A) the name of the applicant;
 - (B) a statement detailing the requested curtailment, abandonment, or restriction, and its requested effective date;
 - (C) a statement indicating that any person may file a written objection with the Commission no later than ten days prior to the requested effective date; but that a written objection alone will not preserve any right to participate as a party in any Commission proceeding on the matter;
 - (D) a statement indicating that in order for any person to participate as a party, such person must file an appropriate and timely intervention according to the Commission's Rules Regulating Practice and Procedure; and
 - (E) the Commission's full mailing address.

- (V) prior to 15 days before the requested effective date, the applicant shall file with the Commission a written affidavit stating its compliance with the notice requirements of subparagraphs (III) and (IV) of this paragraph. The affidavit shall state the date the notice was completed and the method used to give notice. The applicant shall attach a copy of the notice to the affidavit.
- (d) No proposed amendment, change, extension, curtailment, or abandonment shall be effective unless and until the Commission has entered an order approving it.

7103. Transfers, Mergers, and Encumbrances.

- (a) For purposes of this rule, "transferee" means any entity newly acquiring control of operations under a certificate of public convenience and necessity.
- (b) An application to transfer or encumber a certificate of public convenience and necessity, to obtain a controlling interest in any utility, to transfer assets or stock, or to merge a utility with another entity, shall take the form of a joint application if possible, and must include all of the information in paragraph 7002(b) and the following:
 - (I) each applicant's name, trade name if applicable, physical address, and mailing address;
 - (II) a statement detailing the purpose of the application; and
 - (III) in the case of an application to transfer a certificate of public convenience and necessity, to obtain a controlling interest in any utility, or to merge a utility with another entity:
 - (A) the transferee's most recent balance sheet, covering a period ending not earlier than six months before the date of the filing of the application;
 - (B) the transferee's statements of income and retained earnings, if available, for the same time period as provided by subparagraph (III)(A); and
 - (C) the transferee's statement that it understands it must present evidence at the hearing to show its qualifications to operate under the certificate of public convenience and necessity.
 - (IV) A statement disclosing whether any applicant or any affiliate of an applicant is currently in violation of any provision of Title 40, C.R.S., or any Commission rule or order. The disclosure, if applicable, shall include a description of the violations;
 - (V) any agreement or contract and all documents pertaining to the transfer, encumbrance, or merger;
 - (VI) facts showing that the transfer, encumbrance, or merger is in the public interest, and an evaluation of the benefits and detriments, if any, to the customers of each party and to all other persons who will be affected by the transaction; and
 - (VII) a comparison of the kinds and costs of service rendered before and after the proposed transaction.

- (c) When control of a utility is transferred to another utility, or the name is changed, the utility that will afterwards operate under the certificate shall file an adoption notice with the Commission and have the adoption notice available for public inspection at each local office. Adoption notice forms are available from the Commission. The adoption notice shall contain all of the following information:
 - (I) the name, phone number, and complete address of the adopting utility;
 - (II) the name of the previous utility;
 - (III) the number of the tariff adopted, and the description or title of the tariff adopted; and
 - (IV) a statement that the adopting utility is making its own all rates, rules, terms, conditions, agreements, concurrences, instruments, and all other provisions that have been filed or adopted by the previous utility.
- (d) Upon approval of a transfer application, the transferor and transferee shall file an acceptance of transfer form, which form shall be provided by the Commission. The form shall be signed by both parties, indicating acceptance of the terms and conditions of the Order authorizing the transfer. The acceptance of transfer shall contain a statement indicating that the transferee has complied with all provisions of the agreement of sale, lease, or other transfer.
- (e) A transferee shall not begin operations until after the Commission has advised the transferee that it is in compliance with all requirements and is authorized to begin operations.
- (f) A transferor shall not cancel its tariffs until the Commission has approved the transfer, the transferee has filed all required documents in the transferee's own name, and the Commission has advised the transferee that it is authorized to begin operations.

7104. – 7199. [Reserved].

CROSSINGS AND WARNING DEVICES

7200. Applicability.

- (a) Rules 7201 through 7213 apply to railroads, railroad corporations, rail fixed guideways, rail fixed guideway systems and transit agencies.
- (b) Rules 7201 through 7213 apply to all road authorities that own and/or maintain public highways at highway-rail crossings or public pathways at pathway crossings.

7201. Definitions.

The following definitions apply only in the context of rules 7200 through 7213, 7301, and 7327.

- (a) "Accident report" means the U.S. Department of Transportation Highway-Rail Grade Crossing Accident/Incident Report containing information about accidents/incidents that have occurred at a highway-rail or pathway grade crossing available from the Federal Railroad Administration Office of Safety Analysis.

- (b) "Active warning" means traffic control devices and equipment that are activated upon the detected presence of a train including but not limited to, flashing light signals, with or without warning gates, traffic signals, queue cutter signals, wayside horns, and/or blank-out signals that are used to regulate, warn and inform highway or pathway users of the approach or presence of rail traffic at-grade crossings.
- (c) "Advance preemption" means "advance preemption" as that term is defined in Section 1A.13 of the MUTCD.
- (d) "Advance preemption time" means the period of time that is the difference between the required maximum highway traffic signal preemption time and the activation of the railroad or rail fixed guideway system active warning devices.
- (e) "Advance warning sign" means a MUTCD W10-1, W10-2, W10-3, and/or W10-4 sign that gives notice to highway and/or pathway users of the presence of an upcoming crossing.
- (f) "ADT" means average daily traffic.
- (g) "Arterial" means "arterial," as that term is used in Chapter 1 (Highway Functions) of the AASHTO Green Book.
- (h) "Buffer time" means a discretionary time that may be provided in the total warning time to accommodate for minor variations in train handling, track circuit variability and allowable tolerance within locomotive speed measurement apparatus.
- (i) "Clear storage distance" means "clear storage distance" as that term is defined in Section 1A.13 of the MUTCD.
- (j) "Clearance time" means additional time included in the total warning time to account for crossing site specific needs including, but not limited to, widths at multiple track crossings, additional gate delay time, and additional time for simultaneous preemption.
- (k) "Collector" means "collector," as that term is used in Chapter 1 (Highway Functions) of the AASHTO Green Book.
- (l) "Crossing" means either a highway-rail crossing or a pathway crossing.
- (m) "Crossing safety diagnostic" means a gathering of safety and traffic professionals at an existing or proposed highway-rail or pathway crossing including Commission staff and representatives from the road authority and railroad, railroad corporation, rail fixed guideway, transit agency, or owner of the track to evaluate the highway-rail crossing or pathway crossing conditions or proposed conditions and determine the appropriate safety mitigation measures for the existing or proposed highway-rail or pathway crossing.
- (n) "Cycle length" means "cycle length" as that term is defined in Section 1A.13 of the MUTCD.
- (o) "Dynamic envelope" means "dynamic envelope" as that term is defined in Section 1A.13 of the MUTCD.

- (p) "Dynamic exit gate operating mode" means "dynamic exit gate operating mode" as that term is defined in Section 1A.13 of the MUTCD.
- (q) "Equipment response time" means the time necessary for the active warning equipment to respond to detection of a train.
- (r) "Exit gate clearance time" means "exit gate clearance time" as that term is defined in Section 1A.13 of the MUTCD.
- (s) "Exposure factor" means the ADT multiplied by the average daily number of train movements.
- (t) "Freeway" means "interstate highway," "other freeway," and "expressway" as those terms are used in Chapter 1 (Highway Functions) of the AASHTO Green Book.
- (u) "Highway" means any roadway classified as an arterial, collector, freeway or local road.(v)
"Highway-rail crossing" means:
 - (I) the point at which any public highway may be constructed across the tracks or other facilities of any railroad, railroad corporation, rail fixed guideway, rail fixed guideway system, or transit agency at, above, or below grade; or
 - (II) the point at which the tracks or other facilities of any railroad, railroad corporation, rail fixed guideway, rail fixed guideway system, or transit agency may be constructed across any public highway at, above, or below grade; or
 - (III) the point at which any public highway may be constructed across private tracks, over which any railroad, railroad corporation, rail fixed guideway, rail fixed guideway system, or transit agency may operate, at, above, or below grade; or
 - (IV) the point at which private tracks, over which any railroad, railroad corporation, rail fixed guideway, rail fixed guideway system, or transit agency may operate, may be constructed across any public highway at, above, or below grade.
- (w) "Local road" means "local road" as that term is used in Chapter 1 (Highway Functions) of the 2011 edition of the AASHTO Green Book.
- (x) "Maximum highway traffic signal preemption time" means "maximum highway traffic signal preemption time" as that term is defined in Section 1A.13 of the MUTCD.
- (y) "Minimum track clearance distance" means "minimum track clearance distance" as that term is defined in Section 1A.13 of the MUTCD.
- (z) "Minimum warning time" means the least amount of time active warning devices shall operate prior to the arrival of rail traffic at a crossing, which shall be a minimum of 20 seconds.
- (aa) "National Inventory Form" means the U.S. Department of Transportation Crossing Inventory Information form containing specific crossing information available from the Federal Railroad Administration Office of Safety Analysis.

- (bb) "National Inventory Number" means the U.S. Department of Transportation six digit and one letter crossing identification number assigned to a highway-rail or pathway crossing.
- (cc) "Passive warning" means traffic control devices including signs and/or markings that are used to inform, regulate and warn highway or pathway users of the presence of a highway-rail or pathway crossing and the requirement to take appropriate action at the crossing.
- (dd) "Pathway" means a general term denoting a public way for purposes of travel by authorized users outside the traveled way and physically separated from a highway by an open space or barrier, either within the highway right-of-way or within an independent alignment. Pathways include shared-use paths, but do not include sidewalks contiguous with, or separated but adjacent to highway-rail crossings.
- (ee) "Pathway crossing" means:
 - (I) the point as which any public pathway may be constructed across the tracks or other facilities of any railroad, railroad corporation, rail fixed guideway, rail fixed guideway system, or transit agency at, above, or below grade; or
 - (II) the point at which the tracks or other facilities of any railroad, railroad corporation, railroad, rail fixed guideway, rail fixed guideway system, or transit agency may be constructed across any public pathway at, above, or below grade; or
 - (III) the point at which any public pathway may be constructed across private tracks, over which any railroad, railroad corporation, rail fixed guideway, rail fixed guideway system, or transit agency may operate, at, above, or below grade; or
 - (IV) the point at which private tracks, over which any railroad, railroad corporation, rail fixed guideway, rail fixed guideway system, or transit agency may operate, may be constructed across any public pathway at, above, or below grade.
- (ff) "Pavement marking" means a retroreflectorized white marking in advance of an at-grade crossing that consists of an X, the letters RR as shown in Figure 8B-7 of the MUTCD.
- (gg) "Private crossing" means a highway-rail or pathway crossing where the highway or pathway on either side or both sides of the crossing is privately owned, and/or maintained, is intended for use by the owner or by the owner's licenses and invitees, and is not permitted to be used by the public.
- (hh) "Public crossing" means a highway-rail or pathway crossing where the highway or pathway on both sides of the crossing is under the jurisdiction of and/or maintained by a road authority.
- (ii) "Reasonably adequate facility," except as may be otherwise demonstrated, means:
 - (I) for a highway facility:
 - (A) a rural collector roadway that allows for two 12-foot travel lanes with two 5-foot shoulders; or

- (B) a rural arterial roadway that allows for two 12-foot travel lanes with two 8-foot shoulders and an 8-foot pedestrian-bikeway; or
 - (C) an urban collector roadway that allows for two 12-foot travel lanes with two 10-foot parking lanes and an 8-foot pedestrian-bikeway; or
 - (D) an urban arterial roadway that allows for four 12-foot travel lanes with an 11-foot median and an 8-foot pedestrian-bikeway on one side; and
 - (E) collector roadways shall be designed for a 35 mile per hour design speed and arterial roadways shall be designed for a 45 mile per hour design speed;
- (II) for a railroad facility:
- (A) a single main line track that allows for mainline track, one passing track on 15-foot centers and a 12-foot maintenance road under bridge structures on one side, or a 4-foot walkway on bridge structures on one side; or
 - (B) a double mainline track that allows for two mainline tracks and one passing track on 15-foot centers and a 12-foot maintenance road under bridge structures on one side, or a 4-foot walkway on bridge structures on one side; or
 - (C) railroad yards or terminals that allow for currently existing tracks and service facilities.
- (jj) "Right-of-way transfer time" means "right-of-way transfer time" as that term is defined in Section 1A.13 of the MUTCD.
- (kk) "Rural" means "rural" as that term is used in Chapter 1 (Highway Functions) of the AASHTO Green Book.
- (ll) "Separation time" means "separation time" as that term is defined in Section 1A.13 of the MUTCD.
- (mm) "Simultaneous preemption" means "simultaneous preemption" as that term is defined in Section 1A.13 of the MUTCD.
- (nn) "Theoretical structure" means the structure and approaches required to transition to the reasonably adequate facility in accordance with the design standards outlined in the CDOT Bridge Design manual and shall be designed to include the following requirements:
- (I) without consideration to the presence of other adjacent highway or waterway facilities located within the limits of the grade separation project that would also require a bridge structure;
 - (II) using the same selected structure and abutment type as the actual bridge structure;
 - (III) along the same alignment as the actual bridge structure;

- (IV) to the same minimum horizontal and vertical clearances as the actual bridge structure;
and
- (V) to the CDOT Bridge Design Manual preliminary plan stage (30 percent design stage including construction design and phasing costs).
- (oo) "Timed exit gate operating mode" means "timed exit gate operating mode" as that term is defined in Section 1A.13 of the MUTCD.
- (pp) "Total warning time" means the sum of the minimum time, clearance time, and buffer time.
- (qq) "Urban" means "urban" as that term is used in Chapter 1 (Highway Functions) of the AASHTO Green Book.
- (rr) "Utility crossing" means the point at which the tracks or facilities of any public utility may be constructed across the facilities of any other public utility at, above, or below grade, or at the same or different levels.

7202. [Reserved].

7203. Who May Apply.

- (a) An application for authority to construct a crossing where the highway or pathway currently exists may be made by the railroad, railroad corporation, rail fixed guideway, transit agency, or other person, firm, or corporation that will own the tracks proposed to be constructed.
- (b) An application for authority to construct a crossing where the tracks or other facilities currently exist may be made by the appropriate road authority.
- (c) An application for authority to alter or abolish a crossing may be made by the appropriate railroad, railroad corporation, rail fixed guideway, or transit agency that owns the tracks at the crossing, or road authority.
- (d) An application for authority to install or modify active warning or passive warning devices may be made by a railroad, railroad corporation, rail fixed guideway, or transit agency that owns the tracks at the crossing, or road authority. The Colorado Department of Transportation may make application for Federal Section 130 crossing projects in conjunction with, or on behalf of the road authority.
- (e) An application for authority to construct, alter or abolish a utility crossing may be made by the appropriate public utility, railroad, railroad corporation, rail fixed guideway, transit agency or other person, firm, or corporation that will own or owns the tracks or other facilities proposed to be constructed.
- (f) An application for authority to install temporary safety measures in advance of an application to install or modify active warning or passive warning devices may be made by a railroad, railroad corporation, rail fixed guideway, transit agency, or road authority. The Colorado Department of Transportation may make application for temporary safety measures for Federal Section 130 crossing projects in conjunction with, or on behalf of the road authority.

7204. Application Contents.

- (a) In the case of an application (other than to modify or replace the existing crossing surface without changing the width or configuration of a crossing) to construct, alter, or abolish a crossing, a utility crossing, or to install or modify active or passive crossing warning devices, the application shall include, in the following order and specifically identified, the information, as applicable to the specific type of application, in the application or in appropriately identified attachments.
- (I) All crossing and utility crossing applications shall contain the following information:
- (A) the contact person name, mailing address and e-mail address to whom the Commission notice is to be sent:
 - (i) for each railroad, railroad corporation, rail fixed guideway, or transit agency that owns the tracks affected by an application filed by a road authority or utility;
 - (ii) for each road authority that owns the roadway or the utility affected by the application filed by a railroad, railroad corporation, rail fixed guideway, transit agency, or other person, firm, or corporation that will own the tracks affected by the application;
 - (B) the railroad and/or rail fixed guideway line name and milepost number where the crossing that is subject of the application is located;
 - (C) the National Inventory Number and the National Inventory Form for an existing crossing, or a statement that no National Inventory Number and/or National Inventory Form exists for a new crossing;
 - (D) all accident reports for the crossing and/or a listing of all accidents for any rail fixed guideway tracks through the crossing, or a statement that no accident reports and/or listing of rail fixed guideway accidents exist for the crossing;
 - (E) a statement of the date that the required crossing safety diagnostic occurred, or a copy of written correspondence from Commission staff that a crossing safety diagnostic was not required;
 - (F) a statement of:
 - (i) the existing number and character of trains (e.g., through movements, switching movements) passing through the crossing each day if the National Inventory Form has not been updated within three years from the date of the filing of the application, or the existing number, character, and timetable speed of trains as shown on the National Inventory Form if the form has been updated within three years from the date of the filing of the application;
 - (ii) the five-year projection of increases or decreases of the number and character of trains using the crossing; and

- (iii) the maximum timetable speed of trains using the crossing;
- (G) a detailed statement as to the nature of and need for the construction, alteration, abolition, installation, or modification for which approval is sought;
- (H) a statement of the scope of the project, including without limitation:
 - (i) the highway design, pathway design, crossing warning devices, and necessary traffic signal interconnection and preemption;
 - (ii) the detailed itemized estimated cost of the proposed construction, alteration, abolition, or highway-rail or pathway crossing warning device installation or modification;
 - (iii) how applicant proposes to provide for the cost, explaining the proposed apportionment between or among the parties in interest if applicable; and
 - (iv) if the funds necessary for the project are currently available and encumbered;
- (I) a statement of the estimated month and year for:
 - (i) the start date for the construction, alteration, abolition, or crossing warning device installation or modification;
 - (ii) the completion date for the construction, alteration, abolition, or crossing warning device installation or modification;
 - (iii) the date for commencement of operations through the crossing for new crossings;
- (J) a vicinity map that includes the proposed project limits (i.e., a map that includes the general area circumscribing the project);
- (K) the names and mailing addresses of all persons, including adjacent property owners, public utilities, and local government agencies that may be interested in or affected by the application; and
- (L) if the crossing is at-grade: a statement fully justifying why a separation of grades is not practicable under the circumstances.
- (M) for highway-rail crossings a statement of:

- (i) the existing ADT volume and character of vehicles (including, but not limited to percentage of heavy vehicles and number of school buses) passing through the highway-rail crossing each day if the traffic volume on the National Inventory Form has not been updated within three years from the date of the filing of the application, or the existing ADT volume and character of vehicles passing through the highway-rail crossing each day as shown on the National Inventory Form if the traffic volume on the form has been updated within three years from the date of the filing of the application;
 - (ii) the five-year and twenty-year ADT volume projections of vehicles using the highway-rail crossing; and
 - (iii) the posted or unposted speed limit for the vehicles traveling through the highway-rail crossing.
- (N) for pathway crossings a statement of:
 - (i) the existing or estimated number of pedestrians and bicycles passing through the pathway crossing each day and a statement if the number is based on an actual count or an estimate; and
 - (ii) the five-year and twenty-year projections of the number of pedestrians and bicycles using the pathway crossing.
- (II) Applications for new at-grade crossing shall include:
 - (A) detailed final plans/drawings of a suitable scale, showing the at-grade crossing, including signing and striping, tracks, buildings, structures, property lines, and public highways within the right-of-way limits of the railroad, railroad corporation, rail fixed guideway, rail fixed guideway system, or transit agency;
 - (B) a final profile drawing showing grade lines and proposed grade lines of approaches on the public highway or pathway, and the tracks being crossed that may be affected by the proposed or existing crossing;
 - (C) proposed roadway classification (e.g. local road, collector, arterial, freeway) and a cross-section drawing of the road authority's standards for that roadway classification or cross-section drawing of the pathway;
 - (D) the following documentation for all existing crossings within one-mile of the proposed location of the new crossing in urban locations or within towns, or the two crossings nearest the proposed crossing in rural locations:
 - (i) the National Inventory Number and National Inventory Form;
 - (ii) all accident reports or a statement that no accident reports are available; and

- (iii) the existing ADT volume and character of vehicles (including, but not limited to, percentage of heavy vehicles and number of school buses) passing through the highway-rail crossing each day if the traffic volume on the National Inventory Form has not been updated within three years from the date of the filing of the application, or the existing ADT volume and character of vehicles passing through the highway-rail crossing each day as shown on the National Inventory Form if the traffic volume on the form has been updated within three years from the date of the filing of the application.
- (III) Applications to widen, narrow, or relocate an existing crossing shall include:
 - (A) detailed final plans/drawings of a suitable scale, showing the grade crossing, including signing and striping, tracks, buildings, structures, property lines, and public highways within the right-of-way limits of the railroad, railroad corporation, rail fixed guideway, rail fixed guideway system, or transit agency;
 - (B) a final profile drawing showing grade lines and proposed grade lines of approaches on the public highway or pathway and the tracks being crossed that may be affected by the proposed or existing crossing;
 - (C) existing roadway classification (e.g. local, collector, arterial, freeway) and a cross-section drawing of the roadway authority's standards for that roadway classification or cross-section drawing of the pathway; and
 - (D) proposed roadway classification (e.g. local road, collector, arterial, freeway) and a cross-section drawing of the roadway authority's standards for that roadway classification or cross-section drawing of the pathway;
- (IV) Applications to close a crossing by removal of the tracks shall include:
 - (A) detailed final plans/drawings of a suitable scale showing the details of the crossing closure plan;
 - (B) a copy of the notice of proposed closure of the crossing as required under paragraph 7208(c); and
 - (C) traffic volumes required under (I)(H) are not required.
- (V) Applications to close a crossing by removal of the roadway or pathway shall include:
 - (A) the following documentation for all existing crossings within one-mile of the proposed location of the crossing to be closed in urban locations or within towns, or the two crossings nearest the proposed crossing to be closed in rural locations:
 - (i) the National Inventory Number and National Inventory Form;
 - (ii) all accident reports or a statement that no accident reports are available;

- (iii) the existing ADT volume and character of vehicles (including, but not limited to, percentage of heavy vehicles and number of school buses) passing through the highway-rail crossing each day if the traffic volume on the National Inventory Form has not been updated within three years from the date of the filing of the application, or the existing ADT volume and character of vehicles passing through the highway-rail crossing each day as shown on the National Inventory Form if the traffic volume on the form has been updated within three years from the date of the filing of the application;
 - (B) detailed final plans/drawings of a suitable scale showing the details of the crossing closure plan; and
 - (C) the notice of proposed closure of the crossing as required under paragraph 7208(c).
- (VI) Applications to install or change passive warning devices at crossings shall include:
 - (A) a description of the type of warning device the applicant proposes to install; and
 - (B) the detailed railroad cost estimate of the crossing warning devices;
- (VII) Applications for installation of new active warning devices, replacement of existing active warning devices, or replacement of existing train detection circuitry at crossings shall include:
 - (A) detailed final plans/drawings of a suitable scale, showing the crossing, including signing and striping, tracks, buildings, structures, property lines, and public highways within the right-of-way limits of the railroad, railroad corporation, rail fixed guideway, rail fixed guideway system, or transit agency;
 - (B) a description of the type of warning devices the applicant proposes to install (reference may be made to recommended standards on highway-rail grade crossing warning devices as published in current editions of the MUTCD and/or the American Railway Engineering and Maintenance-of-Way Association's Signal Manual of Recommended Practice);
 - (C) the detailed railroad cost estimate of the crossing warning devices; and
 - (D) the schematic diagram of the crossing warning devices (commonly referred to as the "front sheet") and shall specifically identify the equipment response time, advanced preemption time, minimum warning time, clearance time, buffer time, and total warning time.
- (VIII) Applications involving installation of four quadrant gate active warning devices shall include:
 - (A) a description of the type of four quadrant exit gate operating mode proposed (e.g., timed, dynamic exit gate vehicle detection, or timed/dynamic combination);

- (B) for timed exit gate operating mode, the proposed exit gate clearance time, a description of the methodology used to determine the exit gate clearance time and the calculations performed to determine the exit gate clearance time;
 - (C) for dynamic exit gate operating mode, a description of the type of vehicle detection proposed, a plan drawing showing the proposed vehicle detector placement(s) and description and timings of how the vehicle detection will operate; and
 - (D) a letter of concurrence from Commission staff regarding the proposed four-quadrant operations and timings;
- (IX) Applications involving interconnection to traffic signals or queue cutter signals and preemption by active warning signals shall include:
- (A) a statement of the proposed preemption operations (e.g., simultaneous, advanced);
 - (B) the traffic signal timings, including:
 - (i) the traffic signal cycle length;
 - (ii) minimum green time for each signal phase and pedestrian phase;
 - (iii) green times for each signal phase;
 - (iv) yellow change times for each signal phase;
 - (v) red clearance times for each signal phase;
 - (vi) walk times for each pedestrian phase;
 - (vii) flashing don't walk times for each pedestrian phase;
 - (viii) the traffic signal phasing diagram including the preemption sequence; and
 - (ix) a statement of whether and what type of gate down circuitry will be used;
 - (C) a list of and calculations for the following distances and timings:
 - (i) minimum track clearance distance;
 - (ii) design vehicle designation and length;
 - (iii) clear storage distance;
 - (iv) preemption delay time;

- (v) controller response time to preemption call;
 - (vi) worst case conflicting vehicle time and worst case conflicting pedestrian time;
 - (vii) maximum highway traffic signal preemption time;
 - (viii) right-of-way transfer time;
 - (ix) queue clearance time;
 - (x) clearance time;
 - (xi) separation time;
 - (xii) advance preemption time;
 - (xiii) minimum warning time; and
- (D) a letter of concurrence from Commission staff regarding the proposed preemption operations and timings.
- (X) Applications requesting cost allocation to the Highway-Rail Crossing Signalization Fund or Federal Section 130 Fund shall contain specific information regarding the requested apportionment of costs between the railroad, railroad corporation, rail fixed guideway, rail fixed guideway system, or transit agency, the road authority, and the Highway-Rail Crossing Signalization Fund or Federal Section 130 Fund.
- (XI) Applications to change an existing crossing from a public crossing to a private crossing shall include:
- (A) the following documentation for all existing crossings within one-mile of the proposed location of the new crossing in urban locations or within towns, or the two crossings nearest the proposed crossing in rural locations:
 - (i) the National Inventory Number and National Inventory Form;
 - (ii) copies of all accident reports or a statement that no accident reports are available for those crossings;
 - (iii) the existing ADT volume and character of vehicles passing through the highway-rail crossing each day if the traffic volume on the National Inventory Form has not been updated within three years from the date of the filing of the application, or the existing ADT volume and character of vehicles passing through the highway-rail crossing each day as shown on the National Inventory Form if the traffic volume on the form has been updated within three years from the date of the filing of the application;

- (B) documentation (ordinance, ruling, etc.) showing that the road authority agency is proposing to remove the road from its network of ownership, operation, and maintenance; and
 - (C) documentation showing the person that will be owning, operating, and maintaining the private roadway.
- (XII) Applications to change an existing crossing from a private crossing to a public crossing shall include:
- (A) proposed roadway classification (e.g. local road, collector, arterial, freeway) and a cross-section drawing of the road authority's standards for that roadway classification or cross-section of the pathway;
 - (B) a statement that the existing crossing meets the standards of the proposed roadway classification or a statement that the roadway will be changed to meet the current roadway classification standards;
 - (C) documentation (ordinance, ruling, etc.) showing that the road authority is accepting the road into its network for ownership, operation, and maintenance.
- (XIII) Applications to construct a grade separated crossing shall include:
- (A) detailed final plans/drawings of a suitable scale, showing the crossing, including signing and striping, tracks, buildings, structures, property lines, and public highways within the right-of-way limits of the railroad, railroad corporation, rail fixed guideway, rail fixed guideway system, or transit agency;
 - (B) a final profile drawing showing grade lines and proposed grade lines of approaches on the public roadway, highways, streets, or pathways and the tracks being crossed that may be affected by the proposed or existing crossing;
 - (C) final bridge plan drawings that show, at a minimum:
 - (i) the total length of the bridge structure;
 - (ii) the length of each individual span for multiple span bridge structures;
 - (iii) the location of all existing and any possible proposed future tracks in relation to the bridge structure;
 - (iv) the minimum vertical clearance from the top of rail or pavement to the bottom of structure;
 - (v) the minimum horizontal clearance from centerline of track to face of pier or abutment if track is under the bridge structure; and

- (vi) the cross-section of the bridge showing information regarding the roadway, pathway or railroad configuration including, but not limited to, out-to-out distance, fencing, lane widths, walkway widths and median widths.
- (XIV) Applications for a utility crossing shall include:
- (A) detailed final plans/drawings of a suitable scale, showing the utility crossing, tracks, buildings, structures, and property lines within the right-of-way limits of the railroad, railroad corporation, rail fixed guideway, rail fixed guideway system, or transit agency; and
 - (B) a final profile drawing showing grade lines and proposed grade lines of the utility in relation to the tracks being crossed.
- (b) Any engineering schematics, plans, drawings, or maps submitted pursuant to this rule shall be submitted on pages no larger than 11" x 17". All engineering schematics, plans, drawings and maps must be legible. All plan and profile drawings submitted must be able to be printed to and measured by the identified scale.
- (c) If the applicant adopts a substantive change to any map, drawing, plan, or schematic that has been filed with the application, the applicant shall file the new map, drawing, plan, or schematic within ten days of the change. In all cases, the applicant shall submit final maps, drawings, plans, or schematics, as applicable, within ten days of the availability of such final maps, drawings, plans, and schematics.
- (d) An application filed pursuant to paragraph 7203(f), may only be filed subsequent to discussion of the proposed temporary safety measure and consensus of a diagnostic team consisting of the road authority, the railroad, railroad corporation, rail fixed guideway, or transit agency, Commission staff, and the Colorado Department of Transportation if the project is a Section 130 project. The application shall contain the information required by paragraphs 7002(b), and paragraphs 7204(a)(I)(A-E,F(i),G,H(i-iv),I-L, M(i)), and the diagnostic notes including a list of all in attendance, a statement of the temporary safety measure being sought, and a statement that the diagnostic team is in consensus of the proposed temporary safety measure being sought. Notice of this application is provided pursuant to paragraph 7208(d).

7205. Additional Application Contents for Cost Allocation Requests in Grade Separation Applications.

- (a) Any engineering schematics, plans, drawings, or maps submitted pursuant to this rule shall be submitted on pages no larger than 11" x 17". All engineering schematics, plans, drawings and maps must be legible. All plan and profile drawings submitted must be able to be printed to and measurable by the identified scale.
- (b) In the case of applications concerning highway-rail grade separations for which contribution from one or more railroad corporations is requested, the applicant shall, in addition to the information required by paragraph 7204(a), include the following additional information in the application in the following order and specifically identified either in the application or in appropriately identified attachments:

- (I) a complete description of the scope of the proposed separation project;
- (II) a preliminary set of construction plans, including engineering costs;
- (III) a preliminary engineer's cost estimate, including engineering costs;
- (IV) the estimated costs of right-of-way, parcel by parcel, including railroad right-of-way;
- (V) a proposed construction timetable;
- (VI) a list of affected railroad corporations;
- (VII) a preliminary design of the theoretical structure for a reasonably adequate facility; and
- (VIII) a cost estimate of the theoretical structure, including the costs described in subparagraphs (III) and (IV) of this paragraph and including a 20 percent contingency.

7206. Grade Separations — Minimum Criteria for Cost Allocation Consideration.

- (a) For a highway-rail grade separation application to be considered for cost allocation, the following minimum criteria shall be met:
 - (I) exposure factor, actual or projected, shall exceed 85,000 at urban locations and 35,000 at rural locations;
 - (II) the roadway shall be a collector, arterial, or freeway with an actual or no greater than five-year projected ADT volume of 6,000 vehicles per day or greater for urban locations or 2,500 vehicles per day or greater for rural locations; and
 - (III) any rail lines shall have an actual or projected volume of four train movements per day or greater.
- (b) The Commission may consider other locations for cost allocation, if warranted by unusual conditions or circumstances.

7207. Cost Allocation for Grade Separation.

- (a) Upon receipt of an application for a highway-rail grade-separation project, which application meets the criteria of rule 7206, the Commission shall allocate the costs of right-of-way acquisition, engineering, and construction of the theoretical structure that separates a reasonably adequate highway facility from a reasonably adequate railroad facility. The Commission shall impose allocation of costs in the following manner:
 - (I) Except as provided in subparagraph (II) of this paragraph, 50 percent of the cost shall be borne by the railroad corporation or corporations and 50 percent of the cost shall be borne by the State, County, Municipality, or public authority in interest.

- (II) Notwithstanding subparagraph (I) of this paragraph, the Commission may impose a different allocation if demonstrated by evidence of benefit and need. Among other things, the Commission shall consider whether piers or abutments of a roadway overpass hinder the construction of future additional rail lines within the railroad right-of-way and whether the projected life of the overpass structure exceeds the anticipated construction date of the additional rail lines.
- (b) The Commission may determine whether to treat the replacement or realignment of existing grade separations as if there were an at-grade crossing requiring separation. The Commission may determine whether to treat grade separation of roadways on a new alignment as if there were an existing at-grade crossing requiring separation.
- (c) The Commission shall order the total allocation of grade separation expenses and allocation of expenses by year to a railroad through Commission Decision for the approved grade separation project. The Commission shall allocate and track expenses for the approved grade separation project by railroad starting in the first calendar year in which allocation dollars are available, and for each successive calendar year until the total cost of the grade separation project has been fully allocated to the railroad. Total tracked expenditures for a single calendar year shall not exceed two million five hundred thousand dollars per railroad.

7208. Notice.

The Director shall give notice of any application filed under rules 7204 and/or 7205. The Director shall provide said notice to all persons who, in the opinion of the Commission, would be interested in or affected by the grant or denial of the application, including those interested persons the applicant lists in its application.

- (a) The notice provided by the Commission shall take the form of a Notice and Order, and shall contain the following information in addition to the information required by paragraph 1206(b):
 - (I) the name of the applicant;
 - (II) the proceeding number assigned to the application;
 - (III) the application's caption, which shall include the crossing's designation, if any;
 - (IV) the date of the notice;
 - (V) a statement that any person desiring to participate as a party in any proceedings to be held must file an appropriate intervention as required under the Commission's Rules Regulating Practice and Procedure;
 - (VI) the date by which interventions must be filed which shall ordinarily be not less than 30 days after mailing of the notice;
 - (VII) a statement regarding whether the application has been deemed complete as of the date of the notice;

- (VIII) a statement that the Commission may, without a hearing, issue an order granting or denying the application, if no intervention contesting the application has been timely filed;
 - (IX) a statement that if a hearing regarding the application is set, the parties will be notified of the setting; that applicants must appear at the hearing to present evidence in support of the application; and that other parties may appear to present evidence in support of their positions;
 - (X) a statement that, unless previously filed, the applicant shall either file through the E-Filings System or shall file an original and three copies of its list of witnesses and an original and three copies of its attachments at least 20 days prior to the first day of hearing; and that the applicant shall serve each party with its list of witnesses and copies of its attachments;
 - (XI) a statement that each intervenor shall either file through the E-Filings System or shall file an original and three copies of its list of witnesses and an original and three copies of its attachments at least ten days prior to the first day of hearing; and that each intervenor shall serve each party with its list of witnesses and copies of its attachments; and
 - (XII) any other information that the Commission deems appropriate.
- (b) Where the application is for authority to install or modify crossing warning devices under § 40-4-106(2)(b), C.R.S., the notice shall state, in addition to the requirements of paragraph (a) of this rule, that the question of how costs will be borne and paid will be considered at and determined as a result of the hearing.
- (c) Where the application is for authority to close a crossing, the applicant shall give notice by posting notice of the closing on both sides of the trackage of the crossing proposed to be closed and the Commission shall mail notice to the affected parties listed in the application. The posting of notice at the crossing and the Commission notice shall occur on the same day. The notice shall be posted at the crossing and the Commission shall mail the Notice of Application Filed 15 days after the application is filed with the Commission, unless the 15th day falls on a weekend or holiday in which case the notice shall be posted on the last business day prior to the weekend or holiday. The notice is to be posted at the crossing for a period of 30 days. The applicant shall file a written affidavit stating the date the notice was posted at the crossing and shall attach a copy of the notice posted at the crossing to the affidavit.
- (I) The notice shall contain, at a minimum, the following information:
 - (A) the title: Notice of Proposed Closing of This Crossing;
 - (B) a statement that an application to close the crossing has been filed with the Colorado Public Utilities Commission;
 - (C) the current correct address of the Commission;
 - (D) the date the closing of the crossing is requested;
 - (E) the National Inventory Number of the crossing;

- (F) a sufficient description of the crossing so as to identify it, and the proceeding number assigned to the application;
 - (G) a statement that parties have the right to file written interventions or objections with the Commission at the address stated on the notice; and
 - (H) a statement of the last date for filing interventions or objections.
- (II) The notice must meet the following requirements:
- (A) the posted notice to close the crossing shall be printed on a substantial placard, no less than 18" x 24";
 - (B) the title: Notice of Proposed Closing of This Crossing shall be printed in letters no less than one inch in height;
 - (C) all other information printed on the notice shall be in letters no smaller than one half inch in height;
 - (D) the background of the notices shall be white; and
 - (E) the letters of the notice shall be black.
- (III) The notices shall be posted so as to be clearly visible from a distance of no less than 100 feet from the notice, and shall not be posted so as to obstruct the vision of motorists or trains at the crossing.
- (d) The Commission shall give 14 days' notice of the filing of an application made pursuant to paragraph 7203(f).

7209. Uncontested Applications.

Except as provided by § 40-4-106(2)(b), C.R.S., an uncontested and unopposed application may be processed as such under the Commission's Rules Regulating Practice and Procedure.

7210. Failure to Provide Required Information.

If an application does not provide the information required by rules 7204 and 7205, as applicable, the Commission may summarily dismiss the application and close the proceeding.

7211. Crossing Construction and Maintenance.

- (a) A railroad, railroad corporation, rail fixed guideway, transit agency, or owner of the track shall maintain the grade crossing surface from the outside end of the tie to the outside end of the tie at single track crossings. The railroad, railroad corporation, rail fixed guideway, transit agency, or owner of the track shall bear the cost of materials and labor to maintain, repair, or replace an existing crossing surface. Railroads, railroad corporations, rail fixed guideways, transit agencies, and owners of the track shall promptly assist any road authority to the extent required to maintain the road surface between tracks at multiple track crossings. The road authority shall bear the cost of railroad flagging required to maintain the roadway surface between tracks at multiple track crossings.
- (b) The road authority shall bear the cost of materials and labor to install crossing surfaces at a new crossing or to widen the highway portion of an existing crossing including the cost of highway and/or pathway construction traffic control. Extensions of crossing surfaces for the addition of sidewalks to an existing crossing require only the addition of crossing surface panels for the sidewalks and do not require the entire crossing surface to be replaced.
- (c) The road authority shall bear the cost of highway and/or pathway construction traffic control for installation of any new crossings, widening of existing crossings, or maintenance, repair, or replacement of existing crossing surfaces. Railroads, railroad corporations, rail fixed guideways, transit agencies, or owners of the track shall provide sufficient advance notice and coordinate with the road authority regarding any necessary permits and to schedule highway and/or pathway construction traffic control for installation of any new crossings, widening of existing crossings, or maintenance, repair, or replacement of existing crossing surfaces.
- (d) The crossing surface shall be of plank, concrete, rubber, flangeway and asphalt, or other suitable material that is compatible with the highway approaches, and shall be of the same width as the pavement or other surfacing material in the approaches of the adjacent highway including the roadway shoulders. The crossing surface material shall make a reasonably smooth riding surface over the track or tracks and be approximately level with the top of the rails. Wherever practicable, the tracks at multiple track crossings shall be level with the mainline track.
- (e) The road authority that owns the highway shall maintain at its own expense the highway approaches up to the outside end of the ties.
- (f) Whenever a track is constructed at, or removed from a crossing, the owner of the track shall pay the cost of the track construction or removal, including the crossing surface, the highway and/or pathway approaches, and highway and/or pathway construction traffic control.
- (g) Wherever practicable, sidewalks and/or bike paths should be detached from the curb and constructed behind the crossing signal mast. The crossing surface material for said sidewalks and/or bike paths need not be continuous with the crossing surface material of the vehicle travel lanes.

- (h) Pathway crossings of mainline trackage shall be grade separated. Rail fixed guideway and rail fixed guideway systems are exempted from this requirement. Sidewalks or pathway crossings under railroad open deck bridges or trestles shall have a protective cover (roof) extending a reasonable distance beyond the edges of the bridge or trestle to prevent material or debris from striking users of the sidewalk or pathway crossings. Sidewalks and pathway crossings under closed deck bridges may have either a protective cover extending a reasonable distance beyond the edges of the bridge or may have fencing attached to the bridge structure to prevent material or debris from striking users of the sidewalk or pathway crossing.
- (i) Every railroad, railroad corporation, rail fixed guideway, transit agency, or owner of the track, at all points in Colorado where its tracks cross any public highway or public pathway at-grade, shall remove all obstructions along the tracks that block the view of motorists, bicycles, and/or pedestrians as outlined in paragraph 7301(c). The Commission may determine what obstructions are to be removed to secure reasonable safety.
- (j) The Commission may determine the materials to be used in a crossing at the time the Commission considers the application regarding the crossing.

7212. Crossing Safety Diagnostics and Cost Estimates.

- (a) A railroad, railroad corporation, rail fixed guideway, transit agency, owner of the track, road authority, or Commission staff may request a crossing safety diagnostic at any existing or proposed crossing to assess the condition of the existing crossing, to discuss proposed changes to an existing crossing, or to discuss a proposed new crossing. A crossing safety diagnostic must be held at least 30 days prior to the filing of an application for a new crossing, for changes to an existing crossing, or for closure of an existing crossing. If the railroad, railroad corporation, rail fixed guideway, transit agency, owner of the track, road authority, and Commission staff determine jointly that a crossing safety diagnostic for a specific project for which an application will be sought is not necessary, Commission staff shall provide written correspondence to the railroad, railroad corporation, rail fixed guideway, transit agency, owner of the track, and road authority memorializing such determination for use in any future application.
- (b) The railroad, railroad corporation, rail fixed guideway, transit agency, or owner of the track is required to provide any requested cost estimate including a detailed itemized estimate of costs and necessary schematic diagrams for any passive warning devices, active warning devices, and/or crossing surface estimates for new crossings or crossings proposed to be widened within 60 days of the written request by the road authority requesting such cost estimate. The road authority is required to copy Commission staff on any requested cost estimates from the railroad, railroad corporation, rail fixed guideway, transit agency, or owner of the track. If the railroad, railroad corporation, rail fixed guideway, transit agency, or owner of the track fails to provide the requested cost estimate within 60 days of such request, the road authority may provide an estimate of the costs for any proposed passive warning devices, active warning devices, and/or crossing surface estimates as part of the application, and the railroad, railroad corporation, rail fixed guideway, transit agency, or owner of the track from which the estimate was originally requested will be held to the cost estimate plus no more than ten percent over the road authority provided estimate regardless of the actual cost of the required work.

- (c) Commission staff will be required to assist, review and concur with any proposed simultaneous or advance preemption timings at crossings for which interconnection and preemption exists or will be requested, and with proposed exit gate operations and timings at crossings for which four-quadrant gate systems exist or are proposed to be installed. Commission staff's assistance, review, and concurrence must occur at least 30 days prior to the filing of the application.

7213. Minimum Crossing Safety Requirements.

- (a) All public crossings in the state of Colorado shall have posted, at a minimum, one MUTCD R15-1 crossbuck sign, one MUTCD R15-2P number of tracks sign for crossings with more than one track, and one MUTCD R1-2 yield sign, mounted on the same support, for each direction of vehicle and/or pedestrian traffic that crosses the tracks. Any signage configuration different from these minimum standards require approval from the Commission through the filing and granting of an application.
- (b) All public crossings shall have posted, at a minimum, one advance warning sign applicable to the roadway geometry posted for each direction of traffic that crosses the tracks. Applicable advance warning signs include MUTCD signs W10-1, W10-2, W10-3, and W10-4. The road authority may install warning beacons on advance warning signs in accordance with Section 4L.03 of the MUTCD.
- (c) All public highway-rail crossings where the measured storage distance between the dynamic envelope of the crossing and the stop bar location for the intersection downstream from the crossing is less than 80 feet shall post in advance of the highway-rail crossing a MUTCD W10-11 storage space sign with a MUTCD W10-11a supplemental word message storage distance sign indicating the length of storage between the dynamic envelope and the stop bar for the highway.
- (d) Highway-rail grade crossing pavement markings shall be installed on all paved approach lanes to the highway-rail grade crossing for roadways with a posted or statutory speed limit of 40 miles per hour or greater. Highway-rail grade crossing pavement markings should be installed on all paved approach lanes to highway-rail grade crossings for roadways with a posted or statutory speed limit of less than 40 miles per hour. Grade crossing pavement markings may be installed on all approaches to a pathway crossing. Pavement markings shall be installed only on approach lanes where all vehicles will cross the crossing.

7214. – 7299. [Reserved].

SAFETY

Generally

7300. Applicability.

Rules 7301 through 7302 apply to all railroads, railroad corporations, rail fixed guideways, and transit agencies. Additionally, rule 7302 applies to common carriers.

7301. Installation and Maintenance of Crossing Warning Devices.

- (a) All passive and active crossing warning devices, whether electrically operated or otherwise, and of whatsoever nature, which have been installed at public crossings in the state of Colorado, shall be installed, and efficiently maintained and kept in good condition or good operating condition by the railroad, railroad corporation, rail fixed guideway, transit agency, or owner the track at the crossing at the railroad, railroad corporation, rail fixed guideway, rail fixed guideway system, transit agency, or owner of the track's expense for the life of the crossing.
- (b) Whenever active crossing warning devices are interconnected to standard highway traffic signals, the highway traffic signal shall be efficiently maintained and kept in good operating condition by the road authority agency in interest at the road authority's expense for the life of the crossing.
- (c) All advance warning signs and pavement markings which have been installed at public crossings in the state of Colorado shall be efficiently maintained and kept in good condition by the road authority owning and maintaining the roadway at the crossing at the road authority's expense for the life of the crossing.
- (d) Every person to whom this rule applies shall at all times keep its right-of-way free and clear from all obstructions which substantially interfere with the safe sight distance of approaching trains at crossings; provided, however, that:
 - (I) this paragraph (d) shall not apply to existing buildings, permanent structures, and natural obstructions other than trees and vegetation;
 - (II) this paragraph (d) shall not apply to rolling stock or materials temporarily on the right-of-way in connection with switching movements or with the loading or unloading of shipments;
 - (III) this paragraph (d) shall not apply to crossings at which automatic signals and gates are installed. The exception provided by this subparagraph (III) shall only be applicable if such automatic signals and gates are kept free and clear of all obstructions interfering with either:
 - (A) the operation of the automatic signals and gates; or
 - (B) the ability of drivers to detect the automatic signals and gates.
- (e) No grain elevators, storage tanks, warehouses or other buildings which substantially obstruct the view of approaching trains at crossings shall be built on the right-of-way unless and until the railroad complies with any requirements which the Commission may impose as to signals or other safety installation in connection with such obstruction.

[indicates omission of unaffected rules]

7327. Public Highway and Pathway Crossings.

- (a) Where a public highway or pathway crosses above any railroad or rail fixed guideway system track used or proposed to be used for transporting freight cars or passenger cars, minimum overhead and side clearances as set forth in this rule must be observed.
- (b) Overhead clearances.
 - (I) Where a railroad or rail fixed guideway system crosses above any public highway, a minimum overhead clearance of 14'0" shall be provided above the surface of such highway.
 - (II) Where a railroad or rail fixed guideway system crosses any public highway of the State Highway System or any Federal Aid Highway, a minimum overhead clearance of 16'0" shall be provided above the surface of such highway.
 - (III) Where a railroad or rail fixed guideway system crosses above any public pathway, a minimum overhead clearance of 10'0" shall be provided above the surface of such pathway.
- (c) Minimum opening clearances.
 - (I) Where a railroad or rail fixed guideway system crosses above any public highway on a single supporting span, a minimum width of 26'0" shall be provided for the opening for such highway.
 - (II) Where a railroad or rail fixed guideway system crosses any public highway of the State Highway System, or any Federal Aid Highway, on a single supporting span, a minimum width of 30'0" shall be provided for the opening of such highway.
 - (III) Where two or more supporting spans are used for such an opening, the minimum widths specified in subparagraphs (I) and (II) of this paragraph shall be provided for each of such supporting spans.
 - (IV) Where a railroad or rail fixed guideway system crosses above any public pathway, on a single supporting span, a minimum width of 8'0" shall be provided for the opening of the pathway if the pathway is for pedestrian use only, and a minimum width of 12'0" shall be provided for the opening of the pathway if the pathway is a shared use pathway for pedestrian and bicycle use.
