I would urge us as coloradans to stop the foolishness of thinking ballot box biology is the right way to manage wildlife. Colorado Parks and Wildlife is entrusted with this task and has done a wonderful job over the years.

Prop 91 misuses the words trophy hunting and this is pointed out in the Review and Comment Memorandum. These animals are harvest, meat, hides, and furs are utilized. If we take this tool away from CPW we as coloradans will likely pay a contractor or other agency to mitigate problem animals as we have conflicts with these animals. Rather let us maintain the tools, like hunting and trapping, CPW has to mitigate these issue while providing opportunities for coloradans to pursue their endeavors.

Thank you for your time,
Jordan
