product spec sheet request

Hello from Clear Ballot Group.

I am seeking product data sheets for the following Origin items:

- Origin Instruments AC-0301-10 Mouth tubes for sip-and-puff headset (10 tubes, 1 inline filter).
- Origin Instruments AC-0301-100 Mouth tubes (100-Pack)

I have the Breeze product info I need, but the consumable mouth tube specs are almost nonexistent in that spec sheet.

I need this info as part of a document submission requirement to a federal government agency.

Any chance you have it readily available and that you can share it with me? Doesn't need to be fancy or pretty....just seeking a bit more in terms of measurable specifications.

Thanks much in advance.

Hi Russ,

The part numbers you're wanting are for the single user headsets. Are you sure this is what you want? I believe what you're wanting the product data sheets on are the disposable mouthpieces. Is this correct?

Thanks!
Jill

Yes I believe that's what I am seeking. The disposable ones that are packaged in either 10 or 100 piece counts. Does that make sense?

Thanks in advance.

Hi Russ,

Unfortunately we don't have a product data sheet for our mouthpieces.

I apologize for the inconvenience.

Jill

Hello.

That's OK. Thank you for checking.
