 Operating Temp -20°C to +60°C
 Responsive key action..... travel 1.5 mm, actuation force 200 gm
 Large Buttons for clarity and ease of use
 USB Version has 2.5m Cable
 UL Recognized Component

The keypad has EZ Access buttons to support accessibility features. The colors and shapes make them readily identifiable by both sight and touch. The buttons are spaced so people who have difficulty with reach and motion can use them. The five common buttons are :

- **EZ-Help button** - A blue, diamond shaped button with a large white question mark at it's centre. The EZ-Help button is used to gain help on any of the elements on the screen or on the device overall. Pressing this button and any other button will activate the button help feature (or layered help if pressed repeatedly). Pressing this button alone will trigger layered help for the context.
- **Back button** - Its shape is rectangular with an arrow tip pointing left. The button is white in color with the words 'BACK' in its middle. This button allows users to quickly and conveniently return or go back to previous screens or menus - or to pop up if hierarchical menus are used.
- **Down and Up buttons** - These yellow, triangle-shaped buttons provide a way for users to move up and down through the items in the virtual list.
- **Action button** - This is a round, green button . After moving to an actionable item in the virtual list, users can press this button to activate it.

Other implementations use the 8 button keypad, with buttons for Next, Home/Main Menu, and End.
