**EXHIBIT A, STATEMENT OF WORK
(GRANT APPLICATION)**

ELECTRONIC
RECORDING
TECHNOLOGY
BOARD

Grant Application

Updated 9-24-21

Background

In the state of Colorado, a one-dollar per document technology fee was implemented in the early 2000's to aid County offices across the state in funding technological advancements in recording. As a result, Colorado was the first multi-jurisdictional state in the nation to adopt e-Recording across the state.

In the spring of 2014, a working group made up of real estate, lending, legal professionals as well as counties conducted a statewide needs assessment and a request for information to evaluate the state of recording systems in Colorado.

In the spring of 2016, legislation was passed, and this board and a funding structure were created from Senate Bill 16-115.

Our Vision

To create, support, and maintain a statewide land records environment that promotes accessibility and consistency for the public in an efficient and user-friendly manner.

Our Mission

To develop, maintain, improve, replace, or preserve land records systems in our state.

Business Purpose

The business purpose of the board is to develop and modernize electronic filing systems throughout the state as defined in 24-21-402 (2).

Our Core Goals (24-21-403 (1))

- Assure the security, accuracy, and preservation of public records required to be maintained by a Clerk and Recorder.
- Maintain the privacy of personal identifying information, online public access to which is not necessary to the proper functioning of land title records or other public records required to be maintained by a clerk and recorder.
- Assure that the sequence in which documents are received by a clerk and recorder is accurately reflected to the greatest extent practicable.
- Provide for online public access to public documents while maintaining the privacy of personal identifying information when applicable.
- Assure that electronic filing systems used in different counties are similar so as to facilitate the submission and searching of electronic records.

Our Objectives

1. Develop a strategic plan that incorporates the core goals and establish the administration of the Electronic Recording Technology Fund and Board.
2. Determine functionality standards for an electronic filing system that supports the core goals.
3. Issue a Request for Proposal (RFP) for electronic filing system equipment and software that the counties may choose to acquire.
4. Develop best practices for an electronic filing system.
5. Provide training to Clerk and Recorders related to electronic filing systems.
6. Develop a grant program, prepare reports and promulgate any necessary rule-making.
7. Develop subcommittees and project timelines for implementation.

Crowley County is seeking funding for Fraud Notify (fka Fraud Guard), provided by our vendor Tyler Technologies. There is a need for the public to monitor their properties, both locally and remotely, as property fraud continues to rise. The Fraud Notify solution keeps constituents informed when documents are recorded using their personal or property information, alerting them to potential cases of land records fraud. The solution generates and sends automated email alerts detailing the recordings, which can then be used by the county's constituents to determine whether acts of fraud have been committed or if the recordings are valid. Constituents can sign up for and manage their alerts within our county's Self Service application. Fraud Notify helps prevent fraud, and increases transparency and goodwill within the county, as registration for this service is free to the public. This will also help drive revenue to our Self Service site, and create revenue opportunities as we charge for image/copy purchases.

If you are requesting grant funding for digitization and indexing, please describe the documents to be digitized and indexed, including their date ranges and the approximate number of pages and/or documents provide a general description of the documents to be digitized and/or indexed, the approximate date ranges, the total number of pages or documents, and an estimate of the percent of documents that are not related to interests in real property. Describe how the funds will be used to achieve the stated business purpose and core goals.

A) To assure the security, accuracy, and preservation of public records

Fraud Notify allows the public to monitor their recorded records and report any potential fraud or inaccuracies to the county.

B) To maintain the privacy of personal identifying information, online access.

Fraud Notify will be available to our constituents via our online Records Public Access site. As mentioned above, Fraud Notify helps keep our constituents informed when documents are recorded using their personal or property information, alerting them to potential cases of land records fraud.

C) To assure that the sequence in which documents are received by a clerk are accurately reflected to the greatest extent practicable

The adoption of this module will not impact the way Crowley County currently receives documents.

D) To provide for online public access to public records

Crowley County currently provides public access to public records, via Self Service/Records Public Access. Adding Fraud Notify to the menu of items available to the public will only enhance the public experience by increasing transparency and goodwill, while also benefiting the county by driving website traffic and in turn, creating additional revenue.

E) To assure that electronic filing systems used in different counties are similar so as to facilitate the submission and searching of electronic records.

A number of other Colorado Counties offer this solution to their constituents, whether they are Tyler Clients or not. The addition of Fraud Notify would put Crowley County in alignment with other Eagle Clients within the state to offer additional, valuable solutions to the public.
