Hi Andrea,

In reviewing the draft of new rule 35.2 which was pulled from 45.5, we are confused over whether the requirements of 35.2.4 regarding sip and puff devices, etc., apply to equipment currently in service or to those devices that will be certified in the future. The original rule had language about devices approved after 2008, but that does not appear anywhere in the draft rule.

Please clarify if you can.

Thanks,

Al
