05 FEBRUARY 2013

THE HONORABLE SCOTT GESSLER
SECRETARY OF STATE FOR COLORADO
1700 Broadway Ste 200
Denver, CO 80290-1201
United States of America

Dear Mister Secretary:

Please, in regards to Use of Serial Numbers on Ballots (Rule 10.8 TEMP Exp 18 DEC 2012), do away permanently with serialized ballots plus any kind of unique “tracking” marks in voting. As credible research has shown it is not only possible but the practice of tracing ballots back to voters is confirmed in case studies.

This unnecessary and costly serialization of our ballots is not worth it. I urge you to do away with the negative public impact due to realistic voter intimidation. In final the simply egregious lack of respect to our democratic society especially in the current face of serious issues like immigration makes unique user identification attached to a specific ballot unwarranted.

I thank you for your most valuable time plus look forward to your official support and resolution.

Respectfully,
/s Corey Davis on 04 FEB 2013 # @ State of Colorado County of El Paso via MRC BCD33A ###
