My comment related to unique identifiers and barcoding is as follows.

The Secretary should prohibit the printing on ballots prepared for voter use in any election, any symbols, codes, numerals, letters or other similar distinguishing marks that would allow voters, election officials or third parties to identify a ballot from among a set of similarly styled ballots as being the ballot of a particular voter (“unique identifiers”).

I will be supplementing my comments for issues related to batching.

Thank you for considering my comments. Please let me know if you have questions.  
I look forward to submitting additional comments on “batching.”
