Amendment to Rule 20.3.1(e) It is my understanding that only DRE's which are DAU units will have audio available. Therefore I feel the wording should reflect that the county must provide each accessible DRE with a headset with an adjustable volume control.

Amendments to Rule 20.5.2 (E) This amendment as worded would require our county, which contracts with a vendor to program our election, to purchase very expensive software in order to change certain passwords. I think it would suffice to require the county to change only the administrator and user passwords before conducting the logic and accuracy test.

Amendment to Rule 20.17.5 (A) The instruction the election judge gives the voter need only include information about how to repeat and advance the audio playback instructions or text because they need only move the wheel.
