Subject: Election Rule Making session August 14th.

Dear Secretary Gessler:

I am writing to offer comments for the upcoming election rule-making session on August 14. I am a voter in Jefferson County.

With the requirement of mandatory mail ballots, the risks of compromises to the integrity of the election are compounded. Please issue rules that help provide protection from the loss of controls, including the threats to voter privacy.

1. Please require that all hand-delivered ballot envelopes be documented with a chain of custody of the name and address of the person who delivers the ballot. Require that voter sign and affirm that they are allowing a third party to deliver their ballot.
2. Please require the mandatory and proper use of secrecy sleeves on voted ballots to conceal the contents of the ballot from the officials and watchers until the ballot has been de-identified and properly separated from the return envelope.
3. Please require that all clerks provide the opportunity for a voter to vote in private on a **paper ballot** that is not traceable and does not require a mail envelope.
4. Please recommend as "best practice," even if not required by law, that a team of bi-partisan judges review all signatures, not allowing any one judge to unilaterally accept a signature.
5. Please require all canvass board members to complete at least 4 hours of SOS approved training prior to each election, sign an affidavit that proclaims they have read and understand their duties as prescribed by Colorado Statute and Secretary of State Election rules.
6. Require information be printed on the ballot envelopes per rule 7.2.5 that warns against collection of more than 10 ballots, not merely the "drop off" of more than 10 ballots.
7. Amend Rule 7.2.6 to require both the name AND address of the third party deliverer, as is currently required in municipal and local government absentee ballot provisions to help curb ballot harvesting
8. Please stop or at least discourage the early tallying of the ballots. While the statute allows early "counting," up to 15 days before the election, it is unnecessary and an unfair process that few people believe is legitimate. Please give guidance to clerks and make it "best practice" to start counting only on Election Day.
9. Please amend existing SOS rule 8 to further clarify that members of the media are allowed to attend and video record all activities of the canvass board

Thank you for your consideration and the opportunity to comment on proposed rules.

Best regards,
Susan Kochevar

Subject: Comments for the upcoming Election Rules Making session

Dear Secretary Gessler:

I am writing to offer comments for the upcoming election rule-making session on August 14. I am a voter in Boulder County, and I am very, very concerned about the corruption in the election processes made into law by the recent legislative debacle under the guise of making things "fair for everybody" but good for nobody. These same terrible citizens somehow elected to positions of authority, need to be counteracted by a very diligent Secretary of State. It is unfortunate that it falls to you to compensate for their wrong doing.

With the requirement of mandatory mail ballots, the risks of compromises to the integrity of the election are compounded. Please issue rules that help provide protection from the loss of controls, including the threats to voter privacy.

1. Please require that all hand-delivered ballot envelopes be documented with a chain of custody of the name and address of the person who delivers the ballot. Require that voter sign and affirm that they are allowing a third party to deliver their ballot.

Re: Election rule making session 2014

Dear Secretary Gessler,

I am writing to offer comments for the upcoming election rule-making session on August 14. I am a voter in Denver County.

With the requirement of mandatory mail ballots, the risks of compromises to the integrity of the election are escalating. I trust you are also concerned about these vote integrity issues. I ask you to issue rules that provide protection from the loss of controls, including the threats to a voter's privacy.

1. Please require that all hand-delivered ballot envelopes be documented with a chain of custody of the name and address of the person who delivers the ballot. Require that voter sign and affirm that they are allowing a third party to deliver their ballot.
2. Please require the mandatory and proper use of secrecy sleeves on voted ballots to conceal the contents of the ballot from the officials and watchers until the ballot has been de-identified and properly separated from the return envelope.
3. Please require that all clerks provide the opportunity for a voter to vote in private on a paper ballot that is not traceable and does not require a mail envelope.
4. Please recommend as "best practice," even if not required by law, that a team of bi-partisan judges review all signatures, not allowing any one judge to unilaterally accept a signature.
5. Please require all canvass board members to complete at least 4 hours of

SOS approved training prior to each election, sign an affidavit that proclaims they have read and understand their duties as prescribed by Colorado Statute and Secretary of State Election rules.

6. Require information be printed on the ballot envelopes per rule 7.2.5 that warns against collection of more than 10 ballots, not merely the “drop off” of more than 10 ballots.

7. Amend Rule 7.2.6 to require both the name AND address of the third party deliverer, as is currently required in municipal and local government absentee ballot provisions to help curb ballot harvesting

8. Please stop or at least discourage the early tallying of the ballots. While the statute allows early “counting,” up to 15 days before the election, it is unnecessary and an unfair process that few people believe is legitimate. Please give guidance to clerks and make it “best practice” to start counting only on Election Day.

If “counting workload” is of concern, we suggest you shift the workload to take place after the Election Day. This should still provide ample time (10 days) to count and verify before any mandated date for results announcement. See estimated timeline figure below.

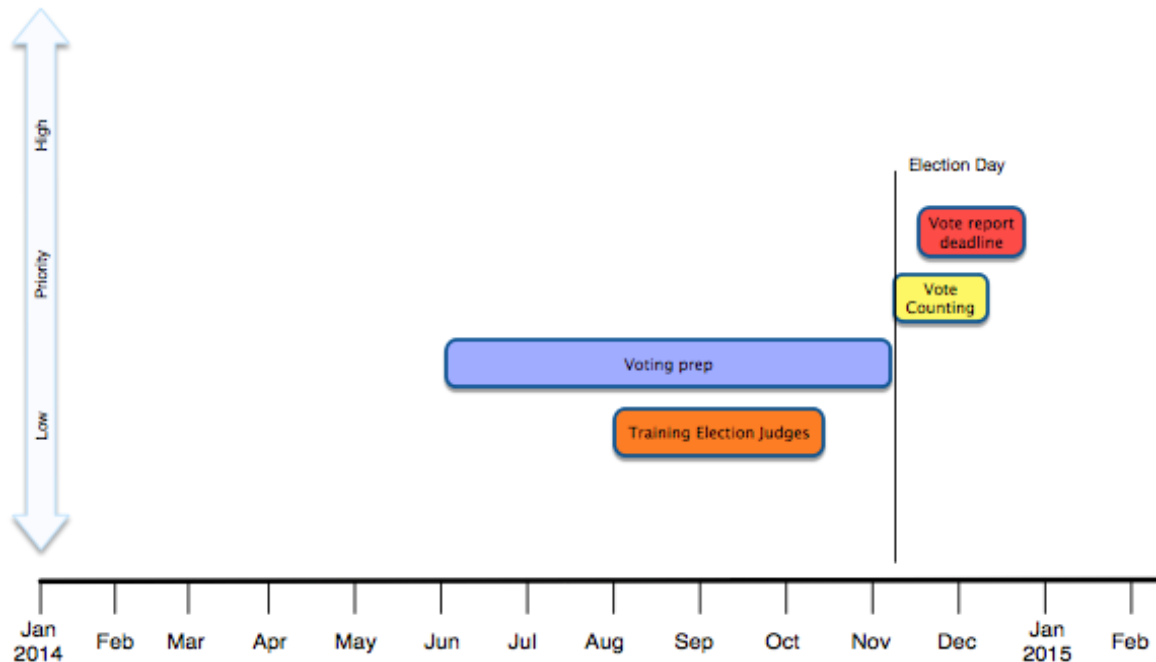

Figure 12014 Timeline showing vote counting starting Election Day and continuing after

9. Please amend existing SOS rule 8 to further clarify that members of the media

From the Desk of Jack and Angelique Matthews

are allowed to attend and video record all activities of the canvass board

We the people believe that voting integrity is important for our preservation and faith in our governmental appointees and protection from scandalous voting.

Thank you for your consideration and the opportunity to comment on proposed rules. I welcome your feedback.

Jack Matthews
