---

\* Amended Rule 2.5.4: Requires the clarification of applicability to a single primary, rather than to all primaries that year.

\* Amended Rule 2.13.2: No. Election judges should still maintain such a log.

\* Amended Rule 8: No. Devices must be available to catch impropriety.

\* Ballot Separation Options for Unaffiliated Voters: Option 1 is best, but it needs additional protection of voter anonymity.

\* Cross-County voting: Reduce or eliminate any incentive for a county to reduce their own voting locations in the hope that residents will choose to vote in an adjoining county, perhaps by designating a minimum number of voting locations per X number of voters, etc. That allows flexibility for travel concerns in rural areas but does not permit voting location reduction below the level of utility for all.

Thank you.

Joe Zemek
