Subject: [EXTERNAL] Comments - Notary rules - 11/16/2020 hearing

Good Afternoon,

Thank you for opening this up to suggestions and making the process quite easy. There are many notaries working within the correctional setting in the State of CO, which is a setting that tends to complicate the notary process in general. I can only speak to difficulties faced at the County level, working with individuals who have limited access and limited information at times. I was wondering if there might be some consideration to the rules regarding this particular setting and other similar settings. Remote notaries are not a consideration due to the nature and infrastructure of the facility. I noticed the suggestion for all blue ink signatures, something that would be helpful to many, but complicating in this setting. For these reasons, I would like to suggest a section particularly relative to providing notaries to those who are incarcerated and other similar settings. Thank you for your time.

Lindsay L.
