Thank you for the opportunity to comment on the rule making

I do not agree with so many changes, I know times are changing but allowing for a company to profit from notaries should not be the focus but to help all citizens equally.   With the growth changes to Colorado we need to stand ground and keep it Colorado and not bring in the changes that have failed in other States.

More clarification and directions would be helpful - ABC how to do remote, but allow for other uses as zoom, facetime, not companies that want to profit from the misfortunes of the economy.

I do agree the fee should be at least $10.00 per stamp. Wage increases have happened and the time spent reading and keeping up on the changes to be a notary does take time.   For myself I work for a government agency and don't charge, but for the business that are notarizing for the general public their insurance has increased, the hired help cost have gone up lets be respectful for our local business.

Regarding the language barrier there is a phone service and translator apps that can be used, let's stop the hardship due to language barriers and let the Notary decide if they feel comfortable doing the notary for the person or recommend them to a business that can help them, the State does not need to step in.

The State does not need to have so much red tape for us to muck through.

I do agree with David, Jack, and Vibiana Bowers.

Any Questions please call.

Charlotte Squires,
Planning Administration Assistant
