Subject: [EXTERNAL] New Colorado State Election Rule Objections.
Date: Tuesday, May 24, 2022 11:32:40 AM

I have concerns with the New Colorado State Election Rules being proposed. I'm an everyday citizen and want to voice my concerns.

Re: HB21-1011

Is it the proper role of the Government to enable those who choose not to learn English to provide an interpreter in order to vote? I object to this rule because as a taxpayer they have the time and resources to learn English which is the official language of our country. They need to learn English to live, work, and abide by the rules of everyday life in America to become an invested citizen anyway, so why would Colorado elected officials want to enable them not to with this bill?

Re: HB21-1071

I'm against the rules giving centralization of our local elections to the SOS. These rules only make more paperwork for the counties and delay those who want to help and or do their job to actually have the time. I signed up to be a poll watcher and signed all the paperwork and it took forever to get approved and I was not able to help. The Elected Officials in each County who are elected by it's citizens should be able to oversee the elections. The Dominion voting systems are not secure and so we need to go to in house voting with paper ballots and voter ID in my opinion. Colorado does not have the most secure election nor will these rules make me feel better. I don't agree with so called video monitored drop boxes and or even allowing a poll watcher to be on sight to watch what goes on because we don't have the authority to do anything about it and it may not be safe. Let's simplify our elections and use the gold standard with in house voting only!

Sincerely,
Lisa Nejedlo
